IEE Proceedings

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 142 1995

The *IEE Proceedings* is published in eleven titles, as follows:

IEE Proceedings — Science, Measurement and Technology

IEE Proceedings — Electric Power Applications

IEE Proceedings — Generation, Transmission and Distribution

IEE Proceedings — Control Theory and Applications

IEE Proceedings — Computers and Digital Techniques

IEE Proceedings — Radar, Sonar and Navigation

IEE Proceedings — Circuits, Devices and Systems

IEE Proceedings — Microwaves, Antennas and Propagation

IEE Proceedings — Communications

IEE Proceedings — Optoelectronics

IEE Proceedings — Vision, Image and Signal Processing

Six issues of each Title are published during the year.

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy individual contributions on condition that a full reference to the source is shown.

Single copies may be made for the purpose of research or private study.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA . This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Multiple copying of the content of this publication without permission is always illegal.

The telephone number of the IEE London office is 0171 240 1871; telex: 261176 IEELDN G; facsimile: 0171 240 7735.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ADAPTIVE CONTROL

Adaptive control of discrete systems using neural networks **CTA** p526
Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Adaptive null formation with a reconfigurable reflector antenna **MAP** p220
Analysis, modelling-and control of an advanced automotive self-levelling suspension system **CTA** p129
BPD computation and model reference adaptive control (MRAC) of Hammerstein plants **CTA** p475
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Developing a neurocompensator for the adaptive control of robots **CTA** p562
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Stable and fast neurocontroller for robot arm movement **CTA** p378
Tracking constrained adaptive power system stabiliser **GTD** p149
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Variable structure based decentralised adaptive control **CTA** p439

AEROSPACE SYSTEMS

Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Helicopter flight control using individual channel design **CTA** p58
ICA-based technique for radiating sources estimation: application to airport surveillance [and reply] **RSN** p211
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Super-resolution range-Doppler imaging **RSN** p25

AMPLIFIERS

Comparison between MMIC matrix and distributed amplifiers **MAP** p75
Determining the power rating of a multichannel linear amplifier **COM** p274
High-gain microwave amplifier tuneable over a decade bandwidth **MAP** p489
High-swing, high-drive CMOS buffer **CDS** p109
Innovative power distributed amplifier using the Wilkinson combiner **MAP** p97
Insensitive voltage-mode and current-mode filters from transimpedance opamps **CDS** p140
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Modified determinations of stability criteria for accurate design of the linear two-port amplifiers **MAP** p192
Multiphase sinusoidal oscillator using the CFOA pole **CDS** p37
New approaches to measurement of operational amplifier common-mode rejection ratio in the frequency domain **CDS** p247
Parasitic-capacitance-insensitive current-mode filters using operational transresistance amplifiers **CDS** p186
Simple allpass sections with complex poles and zeros **CDS** p273
Transformation of sinusoidal oscillators using universal active elements **CDS** p353

ANALOGUE ELECTRONICS

Concurrent error detection in array multipliers by BIDO **CDT** p425
Effects of response quantisation on the accuracy of transient response test results **CDS** p334
Macromodelling series-resonant convertor circuits **CDS** p83
Novel analogue CMOS defuzzification circuit **CDS** p173
Realisation of analogue divider using current feedback amplifiers **CDS** p45
Square-rooting and vector summation circuits using current conveyors **CDS** p223

ANTENNA ACCESSORIES

Analysis and design of circularly polarised series fed planar subarrays **MAP** p173
Cavity feed technique for slot-coupled microstrip patch array antenna **MAP** p452
Discrete complex image MPIE analysis of coax-fed coupled vertical monopoles in grounded dielectric substrate: two formulations **MAP** p269
Dual-band slot-loaded patch antenna **MAP** p225
Microstrip ring antennas operating at higher order modes for mobile communications **MAP** p151
Moment method analysis of a horizontally polarised omnidirectional slot array antenna **MAP** p1
Phase efficiency of the reflective array antenna **MAP** p115
Reconfigurable reflector antenna producing pattern nulls **MAP** p121
Variable beamwidth reflector antenna by feed defocusing **MAP** p394

ANTENNA ARRAYS

Analysis and design of circularly polarised series fed planar subarrays **MAP** p173
Analysis of aperture-coupled microstrip antenna and array with an airgap **MAP** p485
Cavity feed technique for slot-coupled microstrip patch array antenna **MAP** p452
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Direction finding system using symmetric-pair antenna arrays **RSN** p130
Improving efficiencies of superdirective arrays of monopoles over lossy groundplanes by using superconducting disc overlays **MAP** p462
Linear phase arrays based on slitted asymmetric ridge waveguides **MAP** p47
Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136
Microstrip ring antennas operating at higher order modes for mobile communications **MAP** p151
Modelling studies of microstrip reflectarrays **MAP** p78
Moment method analysis of a horizontally polarised omnidirectional slot array antenna **MAP** p1
Partially adaptive array design using DOA estimation and null steering **RSN** p1
Phase efficiency of the reflective array antenna **MAP** p115
Power synthesis of conformal arrays by a generalised projection method **MAP** p467
Predicted performance of a symmetric-pair direction finding system in low signal-to-noise environments **RSN** p199
Radiation by cavity-backed antennas on a circular cylinder **MAP** p233
Spherical shell and volume arrays **MAP** p498
Supergain printed arrays of closely spaced dipoles made of thick film high-T_c superconductors **MAP** p26
Verification of spatial domain integral-equation analysis of microstrip wire-grid arrays **MAP** p314

ANTENNA THEORY

Analysis of a coupled patch antenna with application in personal communications **MAP** p495
Analysis of aperture-coupled microstrip antenna and array with an airgap **MAP** p485
Analytical expressions for reflection coefficients of artificially soft and hard surfaces: dielectric slab loaded with a periodic array of strips over a ground plane **MAP** p145
Boundary-element approach to calculation of wire antenna parameters in the presence of dissipative halfspace **MAP** p435
Cylindrical rectangular microstrip antennas with coplanar parasitic patches **MAP** p300
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Entire-domain analysis of thin-wire antennas near or in lossy ground **MAP** p213
Improved frequency domain analysis of microstrip circuits by the method of moments **MAP** p421
Improving efficiencies of superdirective arrays of monopoles over lossy groundplanes by using superconducting disc overlays **MAP** p462
Input impedance of spherical microstrip antenna **MAP** p285
Linear phase arrays based on slitted asymmetric ridge waveguides **MAP** p47
Moment method analysis of a horizontally polarised omnidirectional slot array antenna **MAP** p1
Phase efficiency of the reflective array antenna **MAP** p115
Power synthesis of conformal arrays by a generalised projection method **MAP** p467
Predicted performance of a symmetric-pair direction finding system in low signal-to-noise environments **RSN** p199
Radiation by cavity-backed antennas on a circular cylinder **MAP** p233
Radiation characteristic of slots on conducting circular cylinder covered by eccentric dielectric cylinder **MAP** p168
Ray tracing analysis of the transmission performance of curved FSS **MAP** p193
Reconfigurable reflector antenna producing pattern nulls **MAP** p121
Resonance properties of cylindrical rectangular patch with composite ground plane **MAP** p307
Simplified analysis of coated wire antennas and scatterers **MAP** p14
Spherical shell and volume arrays **MAP** p498
Study of electromagnetically coupled stacked rectangular patch antennas **MAP** p7
Verification of spatial domain integral-equation analysis of microstrip wire-grid arrays **MAP** p314

ARRAY SIGNAL PROCESSING

'Almost blind' signal estimation using second-order moments **RSN** p213
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Maximum likelihood estimation of signal power in sensor array in the presence of unknown noise field **RSN** p218

AUDIO EQUIPMENT

Digital optical microphone and digital transducer **CDS** p135

AUTOMATA THEORY

Efficient state encoding algorithm based on hypercube construction **CDT** p225
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Self-adaptive random-access protocols for WDM passive star networks **CDT** p306
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation **CDT** p49
State assignment of finite state machines using a genetic algorithm **CDT** p279

AUTOMATIC TEST SYSTEMS

Computer-aided transducer calibration system for a practical power system **SMT** p459
Design of a virtual LCR component meter **SMT** p114
Efficient global strategy for designing and testing scanned sequential circuits **CDT** p170
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Novel approach to alternator field winding interturn fault detection **GTD** p97
Optical fibre investigation of the arc dynamics of a spiral arc current limiting interrupter **GTD** p608
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Weighted BIST structures in the arithmetic unit of a communication processor **CDT** p360

BIOLOGICAL AND BIOMEDICAL SYSTEMS

Analytic solution of the forward problem for induced current electrical impedance tomography systems **SMT** p425
Balloon model of biological cell electropermeabilisation in relation to the radius dependence of membrane dielectric breakdown **SMT** p277
Electrofusion processes: theoretical evaluation of high electric field effects on cellular transmembrane potentials **SMT** p176
Improved approach to boundary location in two-dimensional echocardiographic images **VIS** p121
Mode filtering to reduce ultrasound speckle for feature extraction **VIS** p87

Modified forward-backward overdetermined Prony method and its application in modelling heart sounds **VIS** p375
Optimising the time to solution in electrical impedance tomography **SMT** p433
Signal processing of the contingent negative variation in schizophrenia using multilayer perceptrons and predictive statistical diagnosis **SMT** p269
Techniques for optimal enhancement and feature extraction of fetal electrocardiogram **SMT** p482

BROADCASTING

Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136

CABLES AND OVERHEAD LINES

Digital simulation of fault location on EHV lines using wideband spread spectrum techniques **GTD** p73
Discrete complex image MPIE analysis of coax-fed coupled vertical monopoles in grounded dielectric substrate: two formulations **MAP** p269
Earth fault currents and potentials distribution in composite systems **GTD** p135
Eddy-current effects in slot-bound conductors **EPA** p131
Effect of radiative and convective heat transfer on thermal transients in power cables **GTD** p436
Evaluation of cut-off frequencies of higher order modes in eccentric coaxial line **MAP** p350
Frequency-independent circuit model of earth return effects in transmission systems **GTD** p143
Magnetic fields from transmission lines: comparison of calculations and measurements **GTD** p481
Modelling and control of thyristor-controlled series compensators **GTD** p297
New technique for the accurate location of earth faults on transmission systems **GTD** p119
Pre-equaliser cancellation of sinusoidal phase jitter **COM** p216
Simulation of transients on transmission lines with corona via the method of characteristics **GTD** p81
Water treeing in insulating liquids **SMT** p157

CALIBRATION

Backscattering study on non-orthogonal trihedral corner reflectors **MAP** p441
Computer-aided transducer calibration system for a practical power system **SMT** p459
Method for array calibration in high-resolution sensor array processing **RSN** p90
Stereo calibration from correspondences of OTV projections **VIS** p289

CAPACITORS

Design of a virtual LCR component meter **SMT** p114

CIRCUIT BREAKERS

An investigation into breaker reclosure strategy for adaptive single pole autoreclosing **GTD** p601
Arc modelling in SF_6 circuit breakers **SMT** p189
Current limiting properties of an expanding helical arc **SMT** p201
Determination of M-effect diffusion parameters in high breaking capacity fuses **SMT** p162
Development and application of a 10 MHz digital system for current-zero measurements **SMT** p125
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Optical fibre investigation of the arc dynamics of a spiral arc current limiting interrupter **GTD** p608
Optical-fibre monitoring of high frequency parasitic arcs in a puffer circuit breaker **SMT** p469

CIRCUIT CAD

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
FIDIAS: an integral approach to high-level synthesis **CDS** p227

CIRCUIT COMPONENTS

Design of a virtual LCR component meter **SMT** p114
Determination of M-effect diffusion parameters in high breaking capacity fuses **SMT** p162
Excitation of thick-film resonant sensor structures **SMT** p244
Frequency characteristics and bandwidth enhancement of artificially soft and hard surfaces **MAP** p289
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
Performance and analysis of an aluminium nitride isolation resistor **MAP** p282

CIRCUIT THEORY AND DESIGN

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis of conduction losses in inverters **EPA** p225
Anatomy of a simulation backplane **CDT** p377
Application of a CMOS current mode approach to on-chip current sensing in smart power circuits **CDS** p357
CHiRPS: a general-area parallel multilayer routing system **CDT** p208
Compact $Si_{1-x}Ge_x/Si$ heterojunction bipolar transistor model for device and circuit simulation **CDS** p1
Computer application in the analysis of rectifiers and inverters **EPA** p233
CONVERGE: a circular-assignment-based switchbox router with via reduction **CDT** p72
Design and test generation of C-testable high-speed carry-free dividers **CDT** p193
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Efficient design of ladder-based transconductor-capacitor filters and equalisers **CDS** p263
Efficient functional verification algorithm for Petri-net-based parallel controller designs **CDT** p255
Efficient global strategy for designing and testing scanned sequential circuits **CDT** p170
Efficient height reduction over-the-cell channel router **CDT** p293
FIDIAS: an integral approach to high-level synthesis **CDS** p227
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Full-swing high speed CBiCMOS digital circuit for low-voltage applications **CDS** p8
Generic circuit response interpolation for robust design **CDS** p131
High-level synthesis of data paths for easy testability **CDS** p209
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Innovative power distributed amplifier using the Wilkinson combiner **MAP** p97
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis **CDT** p65
Issues in the design of a logic simulator: an improved caching technique for event-queue management **CDS** p293
Layout driven logic synthesis system **CDS** p158
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Macromodelling series-resonant convertor circuits **CDS** p83
Modelling of acoustic transfer functions for echo cancellers **VIS** p47
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
Novel technology independent neural network approach on device modelling interface **CDS** p74
Orientation assignment of standard cells using a fuzzy mathematical transformation **CDT** p157
Parallel resonant converter as a circuit simulation primitive **CDS** p379
Performance prediction of third-order series resonant convertor **EPA** p29
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Simple allpass sections with complex poles and zeros **CDS** p273
State-plane approach for the analysis of half-bridge parallel resonant converters **CDS** p200
Steady state model of the AC/DC convertor in the harmonic domain **GTD** p109
Study of carrier transport effects on quantum well lasers using a SPICE simulator **OPT** p237
Synthesis and RC-active simulation of an LR terminated LC filter **CDS** p49
Transformer matrix of some transmission lines topologies **CDS** p21
Unified theory of compatible impedances **CDS** p15
VLSI architectures for computing X mod m **CDS** p313

CLOSED LOOP SYSTEMS

Design of PWM controller for sampled-data system using digitally redesigned PAM controller **CTA** p654
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Line conditioning system with simple control strategy and fast dynamic response **GTD** p128
Modelling and control of thyristor-controlled series compensators **GTD** p297
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Parametric approach for eigenstructure assignment in descriptor systems via output feedback **CTA** p611
PWM control method for a four-level inverter **EPA** p390
Real time identification of robot dynamic parameters using parallel processing. 2. Implementation and testing **CTA** p369
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Variable structure based decentralised adaptive control **CTA** p439

CMOS INTEGRATED CIRCUITS

Analysis and modelling of parasitic substrate coupling in CMOS circuits **CDS** p307
Application of a CMOS current mode approach to on-chip current sensing in smart power circuits **CDS** p357
Design and VLSI implementation of a new ASIC for colour measurement **CDS** p153
High-swing, high-drive CMOS buffer **CDS** p109
High-throughput data compressor designs using content addressable memory **CDS** p69
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Novel analogue CMOS defuzzification circuit **CDS** p173
VLSI architectures for computing X mod m **CDS** p313

CODES AND DECODING

Adaptive frequency hopping in HF communications **COM** p99
Aperiodic autocorrelation of Frank sequences **COM** p210
Autocorrelation of Golomb sequences **COM** p281
Bandwidth requirements for bit-sequence codes used in fibre optic multiplexing systems **OPT** p202
Bit-error-rate performance for asynchronous DS-CDMA over multipath fading channels **COM** p307
Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Channel coding for VSAT systems **COM** p333
Cheating detection and cheater identification in secret sharing schemes **CDT** p367
Coding for both protection and synchronisation **COM** p352
Coding gain and spatial localisation properties of discrete wavelet transform filters for image coding **VIS** p133
Concurrent error detection in array multipliers by BIDO **CDT** p425
Construction of 2^n prime-sequence codes for optical code division multiple access **COM** p141
Decoding double-error-correcting Reed-Solomon codes **COM** p345
Decoding of multilevel block modulation codes **COM** p341
Decoding the ternary (23, 12, 8) quadratic residue code **COM** p129

Design and hardware architectures for dynamic Huffman coding **CDT** p411
Design and simulation of an efficient adaptive delta modulation embedded coder **VIS** p155
Development of simple orthogonal transforms for image compression **VIS** p22
Dynamic partial search scheme for stochastic codebook of FS1016 CELP coder **VIS** p52
Efficient computation of quaternary fixed polarity Reed-Muller expansions **CDT** p345
Efficient sharing (broadcasting) of multiple secrets **CDT** p237
Enhancing the security of El Gamal's signature scheme **CDT** p376
Erasing gains for concatenated codes **COM** p121
Extended analysis of word synchronisation using sequence correlation techniques **COM** p357
Fast algorithms for LUC digital signature computation **CDT** p165
Fractional central moment method for movement-invariant object classification **VIS** p213
Generalised Barker-like PN sequences for quasisynchronous spread-spectrum multiple-access communication systems **COM** p91
Grobner basis view of Welch-Berlekamp algorithm for Reed-Solomon codes **COM** p349
Image segmentation for compression of images and image sequences **VIS** p15
Low bit-rate video coding using wavelet vector quantisation **VIS** p141
Low-complexity trellis decoding of linear block codes **COM** p201
Low-frequency suppression of baseband coded sequences **COM** p49
Multiple-inputs systolic priority queue for fast sequential decoding of convolutional codes **CDS** p282
New class of t-error correcting and all unidirectional error detecting (t-EC/AUED) codes **CDT** p32
Novel design of arithmetic coding for data compression **CDT** p419
Peano scanning based classified vector quantiser **VIS** p111
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Performance-bound analysis of the new DS/SSMA protocol for wireless data networks **COM** p255
Pragmatic approach to soft-decision decoding of linear block codes **COM** p40
Proppsed UPC meeting both packet video and network goals **COM** p227
Pulsed residual excited linear prediction **VIS** p105
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions **CDT** p325
Some new families of optical orthogonal codes for code-division multiple-access fibre-optic networks **COM** p363
The security of He and Kiesler's signature schemes **CDT** p370
Very low-bit-rate segmentation-based video coding using contour and texture prediction **VIS** p253

COMMUNICATION SYSTEM THEORY

Adaptive traffic-load shedding and its capacity gain in CDMA cellular systems **COM** p186
Alternative routing strategies for adjacent cells in mobile radio systems **COM** p115
Analysis of an output-buffered ATM switch with speed-up constraints under correlated and imbalanced bursty traffic **COM** p61
Analysis of banyan networks offered traffic with geometrically distributed message lengths **COM** p285
Bit-error-rate performance for asynchronous DS-CDMA over multipath fading channels **COM** p307
Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Cell-rate modelling for accelerated simulation of ATM at the burst level **COM** p379
Collision resolution algorithm for M-priority users **COM** p151
Construction of 2^n prime-sequence codes for optical code division multiple access **COM** p141
Construction of optimal frequency hopping sequences for minimising bit errors in selective fading channels characteristic to digital cellular systems **COM** p271
Cost-performance analysis of cascaded crossbar interconnected multiprocessors **CDT** p117
Design and performance analysis of an asynchronous banyan network switch with window policy **COM** p54
Diversity for noncoherent DPSK direct-sequence CDMA over a shadowed Rician-fading satellite channel **COM** p386
Dynamic polling orders in multiserver multiqueue systems **COM** p75
Estimating the cost of a telecommunications network using the fractal structure of the human population distribution **COM** p172
Generalised Barker-like PN sequences for quasisynchronous spread-spectrum multiple-access communication systems **COM** p91
Maximum entropy and minimum relative entropy in performance evaluation of digital communication systems **COM** p250
Modified stochastic gradient algorithm using nonquadratic cost functions for data echo cancellation **VIS** p187
Multiple call hand-off problem with queued hand-offs and mixed platform types **COM** p31
Narrowband interference rejection in direct-sequence spread-spectrum system using time-frequency decomposition **COM** p393
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
New approach for traffic characterisation in ATM networks **COM** p87
Performance analysis of an input and output queueing packet switch with a priority packet discarding scheme **COM** p67
Performance analysis of burst admission-control protocols **COM** p7
Performance-bound analysis of the new DS/SSMA protocol for wireless data networks **COM** p255
Schemes for equalisation of communication channels with nonlinear impairments **COM** p165
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Some new families of optical orthogonal codes for code-division multiple-access fibre-optic networks **COM** p363
Subspace approach to channel assignment in mobile communication networks **COM** p179
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106
Triple-receiver-based code protocol for unslotted DS/SSMA packet-radio networks and its performance analysis **COM** p193
Window-based surveillance strategies **CDT** p233

COMPUTATIONAL COMPLEXITY

CHiRPS: a general-area parallel multilayer routing system **CDT** p208
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions **CDT** p249
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87
Efficient state encoding algorithm based on hypercube construction **CDT** p225
Low-complexity trellis decoding of linear block codes **COM** p201
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
Parallel multigrid algorithms on CM-5 **CDT** p177
Realisation of morphological operations **CDS** p364
Two-dimensional median filter algorithm for parallel reconfigurable computers **VIS** p345
VLSI architectures for computing X mod m **CDS** p313

COMPUTER APPLICATIONS

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
Anatomy of a simulation backplane **CDT** p377
Application of a CMOS current mode approach to on-chip current sensing in smart power circuits **CDS** p357
Arc modelling in SF_6 circuit breakers **SMT** p189
Artificial intelligence-based machine-learning system for thermal generator scheduling **GTD** p195
Artificial neural network-based method for transient response prediction **GTD** p323
CHiRPS: a general-area parallel multilayer routing system **CDT** p208
Combined active reactive despatch. Part 2: test results **GTD** p401
Compact $Si_{1-x}Ge_x/Si$ heterojunction bipolar transistor model for device and circuit simulation **CDS** p1
Computer-aided transducer calibration system for a practical power system **SMT** p459
Computer application in the analysis of rectifiers and inverters **EPA** p233
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
CONVERGE: a circular-assignment-based switchbox router with via reduction **CDT** p72
Design of a virtual LCR component meter **SMT** p114
Determination of M-effect diffusion parameters in high breaking capacity fuses **SMT** p162
Digital interval model conversion and simulation of continuous-time uncertain systems **CTA** p315
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Efficient functional verification algorithm for Petri-net-based parallel controller designs **CDT** p255
Efficient global strategy for designing and testing scanned sequential circuits **CDT** p170
Efficient height reduction over-the-cell channel router **CDT** p293
Expert system for the optimum design of measurement systems **SMT** p330
FIDIAS: an integral approach to high-level synthesis **CDS** p227
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Full-swing high speed CBiCMOS digital circuit for low-voltage applications **CDS** p8
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Generic circuit response interpolation for robust design **CDS** p131
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
High-level synthesis of data paths for easy testability **CDS** p209
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Hybrid knowledge-based system/multilayer perceptron approach for the post-assembly tuning of electronic filters **CDS** p277
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis **CDT** p65
Issues in the design of a logic simulator: an improved caching technique for event-queue management **CDS** p293
Layout driven logic synthesis system **CDS** p158
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Macromodelling series-resonant convertor circuits **CDS** p83
Modelling and control of thyristor-controlled series compensators **GTD** p297
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
Neural network-based algorithm for power transformer differential relays **GTD** p386
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Novel approach to alternator field winding interturn fault detection **GTD** p97
Novel technology independent neural network approach on device modelling interface **CDS** p74
Numerical modelling and simulation of hysteresis effects in magnetic cores using transmission-line modelling and the Preisach theory **EPA** p57
Online PCBN tool failure monitoring system based on acoustic emission signatures **SMT** p404
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185
Optimising individual control rules and multiple communicating rule-based control systems with parallel distributed genetic algorithms **CTA** p211
Orientation assignment of standard cells using a fuzzy mathematical transformation **CDT** p157
Parallel resonant converter as a circuit simulation primitive **CDS** p379
Partial discharge pulse distribution pattern analysis **SMT** p46
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Radar tomography for the generation of three-dimensional images **RSN** p54
Reactive reserve management **GTD** p17

Real time identification of robot dynamic parameters using parallel processing. 2. Implementation and testing **CTA** p369
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Rule-based variable-gain power system stabiliser **GTD** p29
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Single-phase switch-mode rectifier employing voltage-reversal circuit switched with a fixed frequency **EPA** p154
Statistical process control: examination of use in a small printed circuit board manufacturer **SMT** p463
Structured methodology for the selection and effective implementation of manufacturing control systems **SMT** p411
Techniques for ASIC implementation of vector control **CDT** p318
VLSI architectures for computing X mod m **CDS** p313

COMPUTER COMMUNICATIONS

Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Methodology for derivation of network resources to support video-related services in ATM-based private wide-area networks **COM** p233
Optimal design of a finite-buffer polling network with mixed service discipline and general service order sequence **COM** p1
Two-connected multiple-token multiple-ring network **COM** p369
Window-based surveillance strategies **CDT** p233

CONTROL SYSTEMS ANALYSIS

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Analysis, modelling-and control of an advanced automotive self-levelling suspension system **CTA** p129
Anticipatory fuzzy control of power systems **GTD** p211
Application of decoupling method to Hamiltonian systems **CTA** p595
Bearings-only tracking using a set of range-parameterised extended Kalman filters **CTA** p73
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Combined active reactive despatch. Part 2: test results **GTD** p401
Control system design issues for unstable linear systems with saturated inputs **CTA** p335
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Design of PWM controller for sampled-data system using digitally redesigned PAM controller **CTA** p654
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Digital interval model conversion and simulation of continuous-time uncertain systems **CTA** p315
Digital modelling and digital redesign of sampled-data uncertain systems **CTA** p585
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Discretisation of continuous-time control systems with guaranteed stability **CTA** p323
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Dynamic recurrent neural network for system identification and control **CTA** p307
Efficient pole placement technique for linear time-variant SISO systems **CTA** p451
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic control of an automotive suspension system **CTA** p149
Fuzzy logic power system stabiliser **GTD** p277
Helicopter flight control using individual channel design **CTA** p58
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Identification and dynamic weights for LQG control with integral action **CTA** p647
Inverse Nyquist array: a quantitative theory **CTA** p23
Linear switching controller convergence **CTA** p329
Linearly pulse-width modulated block pulse functions and their application to linear SISO feedback control system identification **CTA** p44
LKF based robust control of electrical servodrives **EPA** p161
Model reduction via parameter matching using a Gramian technique **CTA** p186
Modelling and control of thyristor-controlled series compensators **GTD** p297
Multifrequency Routh approximants for linear systems **CTA** p351
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Neural network-based algorithm for power transformer differential relays **GTD** p386
New frequency-domain design method for PID controllers **CTA** p265
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Parameter estimation of state space models by recurrent neural networks **CTA** p114
Parametric approach for eigenstructure assignment in descriptor systems via output feedback **CTA** p611
Perfect output control for nonsquare generalised state space systems **CTA** p119
Position control of a brushless DC motor without velocity measurements **EPA** p113
PWM control method for a four-level inverter **EPA** p390
Real time identification of robot dynamic parameters using parallel processing. 1. Theory **CTA** p359
Redesign of robust controllers for rigid-link flexible-joint robotic manipulators actuated with harmonic drive gearing **CTA** p508
Robust performance design of multivariable control systems **CTA** p7
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Simplified control strategy to improve AC-input-current waveform of parallel-connected current-type PWM rectifiers **EPA** p246
Solution of the bilinear matrix equation using Astrom-Jury-Agniel algorithm **CTA** p603
Stability of time-delay singularly perturbed systems **CTA** p111
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Tracking constrained adaptive power system stabiliser **GTD** p149
Transformerless four-wire PWM rectifier and its application in AC-DC-AC converters **EPA** p410
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Variable structure based decentralised adaptive control **CTA** p439

CONTROL SYSTEM SYNTHESIS

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Analysis, modelling-and control of an advanced automotive self-levelling suspension system **CTA** p129
Anticipatory fuzzy control of power systems **GTD** p211
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Control system design issues for unstable linear systems with saturated inputs **CTA** p335
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Design of PWM controller for sampled-data system using digitally redesigned PAM controller **CTA** p654
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Digital modelling and digital redesign of sampled-data uncertain systems **CTA** p585
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Dynamic recurrent neural network for system identification and control **CTA** p307
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic control of an automotive suspension system **CTA** p149
Fuzzy logic power system stabiliser **GTD** p277
LKF based robust control of electrical servodrives **EPA** p161
Modelling and control of thyristor-controlled series compensators **GTD** p297
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Neural network-based algorithm for power transformer differential relays **GTD** p386
New frequency-domain design method for PID controllers **CTA** p265
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Position control of a brushless DC motor without velocity measurements **EPA** p113
PWM control method for a four-level inverter **EPA** p390
Redesign of robust controllers for rigid-link flexible-joint robotic manipulators actuated with harmonic drive gearing **CTA** p508
Robust performance design of multivariable control systems **CTA** p7
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Variable structure based decentralised adaptive control **CTA** p439

CONVERTORS

Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis and simulation of the high-speed torque performance of brushless DC motor drives **EPA** p191
Analysis of conduction losses in inverters **EPA** p225
Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Computer application in the analysis of rectifiers and inverters **EPA** p233
Design and analysis of H-soft-switched converters **EPA** p255
Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Eddy current iron losses in axially laminated brushless motors **EPA** p183
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Experimental investigation of an advanced static VAr compensator **GTD** p202
Fixed-frequency buck-boost zero-voltage-switched quasiresonant converter **EPA** p289
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
HVDC convertor waveform distortion: a frequency-domain analysis **GTD** p88
Impact on the power system of single-phase input cycloconvertor motor drives **EPA** p176
Line conditioning system with simple control strategy and fast dynamic response **GTD** p128
Losses in PWM inverters using IGBTs **EPA** p285
Minimisation of circuit complexity of step-up/down three-phase AC to DC converter with sinusoidal input current and unity power factor **EPA** p63
Modelling and control of thyristor-controlled series compensators **GTD** p297
Naturally commutated thyristor-controlled high-pulse VAr compensator **GTD** p219
Nonlinear capacitive snubbers for improved zero-voltage switching with reduced electromagnetic interference and minimum voltage stresses **EPA** p329
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Performance prediction of third-order series resonant convertor **EPA** p29
PWM control method for a four-level inverter **EPA** p390
PWM technique utilisation in the quasiresonant convertor **EPA** p145
Robust control of series parallel resonant converters **CTA** p401
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Simplified control strategy to improve AC-input-current waveform of parallel-connected current-type PWM rectifiers **EPA** p246
Single-phase switch-mode rectifier employing voltage-reversal circuit switched with a fixed frequency **EPA** p154
Soft-switching single-phase–three-phase converters with near unity power factor **EPA** p23
Steady state model of the AC/DC convertor in the harmonic domain **GTD** p109
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297

Three-phase four wire voltage controlled AC line conditioner with unity input power factor and minimised output voltage harmonics **EPA** p43
Three-phase multifunctional battery energy storage system **EPA** p275
Transformerless four-wire PWM rectifier and its application in AC-DC-AC converters **EPA** p410
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345

CYBERNETICS AND ROBOTICS

Application of decoupling method to Hamiltonian systems **CTA** p595
Design and VLSI implementation of a new ASIC for colour measurement **CDS** p153
Developing a neurocompensator for the adaptive control of robots **CTA** p562
Friction compensation and robustness issues in force/position controlled manipulators **CTA** p569
Functional diagnosis and prescription of measurements using effort and flow variables **CTA** p420
Fuzzy model based fault diagnosis **CTA** p545
Hybrid method for systems analysis **SMT** p350
Mobile vehicle navigation in unknown environments: a multiple hypothesis approach **CTA** p385
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Novel technology independent neural network approach on device modelling interface **CDS** p74
Optimal path planning for a trolley crane: fast and smooth transfer of load **CTA** p51
Process for diagnostic reasoning integrating uncertain and temporal information **CTA** p575
Real time identification of robot dynamic parameters using parallel processing. 1. Theory **CTA** p359
Redesign of robust controllers for rigid-link flexible-joint robotic manipulators actuated with harmonic drive gearing **CTA** p508
Stable and fast neurocontroller for robot arm movement **CTA** p378

DATA COMMUNICATION

Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87
Methodical use of cryptographic transformations in authentication protocols **CDT** p272
Optimal design of a finite-buffer polling network with mixed service discipline and general service order sequence **COM** p1
Self-adaptive random-access protocols for WDM passive star networks **CDT** p306
Two-connected multiple-token multiple-ring network **COM** p369
Two parallel paths in incomplete hypercubes **CDT** p353
Window-based surveillance strategies **CDT** p233

DATA HANDLING

Design and hardware architectures for dynamic Huffman coding **CDT** p411
Novel design of arithmetic coding for data compression **CDT** p419
Object-oriented design of trouble call analysis system on personal computer **GTD** p167
Partial discharge signal generation transmission and acquisition **SMT** p22
Peano scanning based classified vector quantiser **VIS** p111
SOUT optical intersatellite communication terminal elegant breadboard **OPT** p279
Spatial bounding of complex CSG objects **CDT** p431

DATA SECURITY

Cheating detection and cheater identification in secret sharing schemes **CDT** p367
Efficient sharing (broadcasting) of multiple secrets **CDT** p237
Enhancing the security of El Gamal's signature scheme **CDT** p376
Fast algorithms for LUC digital signature computation **CDT** p165
Methodical use of cryptographic transformations in authentication protocols **CDT** p272
On the Matsumoto and Imai human identification scheme **CDT** p313
The security of He and Kiesler's signature schemes **CDT** p370

DIELECTRIC MATERIALS AND DEVICES

Calculation of dielectric resonators with complicated constitutive parameters **MAP** p477
Charge images in a dielectric sphere **SMT** p495
Computation of coupling between whispering gallery mode dielectric resonators and a microstrip transmission line **MAP** p265
Excitation of thick-film resonant sensor structures **SMT** p244
Experimental investigations of high-voltage motor switching surges **GTD** p233
Fabrication of a thick film sensor employing an ultrasonic oscillator **SMT** p249
Frequency characteristics and bandwidth enhancement of artificially soft and hard surfaces **MAP** p289
Ray tracing analysis of the transmission performance of curved FSS **MAP** p193
Simplified analysis of coated wire antennas and scatterers **MAP** p14

DIGITAL ARITHMETIC

Design and test generation of C-testable high-speed carry-free dividers **CDT** p193
Efficient CORDIC-based systolic architectures for the discrete Hartley transform **CDT** p201
Fast algorithms for LUC digital signature computation **CDT** p165
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Optimising a high-speed serial/parallel sum-of-products hardware structure with respect to bus utilisation **CDT** p77
Programmable high-performance IIR filter chip **CDS** p179
Quotient prediction without prescaling **CDT** p15
Systolic implementation of fixed-point state-space digital filter **CDS** p193
Two's-complement fast serial-parallel multiplier **CDS** p41
VLSI architectures for computing X mod m **CDS** p313

DIGITAL ELECTRONICS

Design and analysis of a 0.6 V-operating merged CMOS-bipolar SRAM cell **CDS** p369
Design and VLSI implementation of a new ASIC for colour measurement **CDS** p153
Design and VLSI implementation of an address generation coprocessor **CDT** p145
Direct interpolation method for reducing the non-linearity and quantisation distortion of analogue-to-digital convertors **CDS** p61
Efficient CORDIC-based systolic architectures for the discrete Hartley transform **CDT** p201
Efficient technique for partitioning and programming linear algebra algorithms on concurrent VLSI architectures **CDS** p97
Embedded ADC characterisation techniques **CDS** p145
FIDIAS: an integral approach to high-level synthesis **CDS** p227
Full-swing high speed CBiCMOS digital circuit for low-voltage applications **CDS** p8
Functionally separated, multiple-valued content-addressable memory and its applications **CDS** p165
High-level synthesis of data paths for easy testability **CDS** p209
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
High-throughput data compressor designs using content addressable memory **CDS** p69
Issues in the design of a logic simulator: an improved caching technique for event-queue management **CDS** p293
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Manifestations of faults in single- and double-BJT BiCMOS logic gates **CDT** p135
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
Reliability of semiconductor RAMs with soft-error scrubbing techniques **CDT** p337
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Techniques for ASIC implementation of vector control **CDT** p318
VLSI design of clustering analyser using systolic arrays **CDT** p185
Weighted BIST structures in the arithmetic unit of a communication processor **CDT** p360

DIGITAL FILTERS

Approximations of IIR periodically time-varying digital filters **CDS** p387
Coding gain and spatial localisation properties of discrete wavelet transform filters for image coding **VIS** p133
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Fast pipelined CORDIC-based adaptive lattice predictor: algorithms and architecture **VIS** p339
Modelling of acoustic transfer functions for echo cancellers **VIS** p47
Order reduction technique using the Chebyshev polynomial and its application in digital filter design **CDS** p27
Programmable high-performance IIR filter chip **CDS** p179
Realisation of morphological operations **CDS** p364
Semi-analytical recursive algorithms for convolution calculations **CDS** p125
Systolic implementation of fixed-point state-space digital filter **CDS** p193
Time-varying two-dimensional state-space structures **CDS** p120

DIGITAL TECHNIQUES

2D optical fully bipolar neural network using colour encoding **OPT** p121
Design and VLSI implementation of an address generation coprocessor **CDT** p145
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87

DISCRETE SYSTEMS

Adaptive control of discrete systems using neural networks **CTA** p526
Design of PWM controller for sampled-data system using digitally redesigned PAM controller **CTA** p654
Digital interval model conversion and simulation of continuous-time uncertain systems **CTA** p315
Digital modelling and digital redesign of sampled-data uncertain systems **CTA** p585
Discretisation of continuous-time control systems with guaranteed stability **CTA** p323
Identification and dynamic weights for LQG control with integral action **CTA** p647
Multifrequency Routh approximants for linear systems **CTA** p351
Multivariable system simplification using moment matching and optimisation **CTA** p103
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Performance enhancement of limited-bandwidth active automotive suspensions by road preview **CTA** p140
Solution of the bilinear matrix equation using Astrom-Jury-Agniel algorithm **CTA** p603

DISTRIBUTED PARAMETER SYSTEMS

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Design of PWM controller for sampled-data system using digitally redesigned PAM controller **CTA** p654
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
Stability of time-delay singularly perturbed systems **CTA** p111
Stability robustness bounds for linear systems with delayed perturbations **CTA** p345

EARTH SCIENCES

Frequency dependence of backscattered signals from forest components **RSN** p301
High order nonlinearities in HF radar backscatter from the ocean surface **RSN** p293
Image registration in interferometric SAR processing **RSN** p313
New strategy to locate buried objects in highly lossy ground **RSN** p306
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Texture classification using a spatial-point process model **VIS** p1

EDDY CURRENTS

Eddy-current effects in slot-bound conductors **EPA** p131
Finite-element variational formulation of the impedance boundary condition for solving eddy current problems **SMT** p293
General approach to prove the existence and uniqueness of the solution in vector potential formulations of 3-D eddy current problems **SMT** p299
T-Ω method using hierarchal edge elements **SMT** p133

ELECTRIC DISCHARGES

An approach to partial-discharge investigation by height-distribution analysis **SMT** p102
Arc modelling in SF_6 circuit breakers **SMT** p189
Directivity of acoustic signals from partial discharges in oil **SMT** p85
Discharge pattern recognition in high voltage equipment **SMT** p51
Effect of barriers on tree growth in solid insulation **SMT** p283
Electric arc temperature estimation of a fibre splicer **OPT** p313
Measurements of void gas pressure during combined thermal and partial discharge ageing of epoxy **SMT** p17
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Partial discharge detection: theoretical and practical aspects **SMT** p29
Partial discharge mechanisms in voids related to dielectric degradation **SMT** p62
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge pulse distribution pattern analysis **SMT** p46
Partial discharge signal generation transmission and acquisition **SMT** p22
Partial discharges in flat, dielectric/metallic bounded cavities **SMT** p490
Physical and chemical aspects of partial discharges and their effects on materials **SMT** p11
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Simulation of transients on transmission lines with corona via the method of characteristics **GTD** p81
Transformation of nodules into crystals on polymers submitted to corona discharges with streamers **SMT** p477
Water treeing in insulating liquids **SMT** p157

ELECTRO-OPTICAL DEVICES

Comparative analysis of the performance limits of Franz-Keldysh effect and quantum-confined Stark effect electroabsorption waveguide modulators **OPT** p109
Proposal for high extinction ratio $LiNbO_3$ optical waveguide cutoff modulator **OPT** p248

ELECTROMAGNETIC INTERFERENCE

Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Nonlinear capacitive snubbers for improved zero-voltage switching with reduced electromagnetic interference and minimum voltage stresses **EPA** p329
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206

ELECTROMAGNETIC THEORY

Adaptive frequency hopping in HF communications **COM** p99
Adaptive null formation with a reconfigurable reflector antenna **MAP** p220
Analysis and design of circularly polarised series fed planar subarrays **MAP** p173
Analysis of electromagnetic scattering by artificially soft discs **MAP** p399
Analytical expressions for reflection coefficients of artificially soft and hard surfaces: dielectric slab loaded with a periodic array of strips over a ground plane **MAP** p145
Application of the transmission line matrix method to the analysis of scattering by three-dimensional objects **MAP** p319
Backscattering study on non-orthogonal trihedral corner reflectors **MAP** p441
Computational analysis of scattering by penetrable oblate spheroids using a model of dipoles located in complex space **MAP** p245
Control of the spectra of DS-SS split signals by interleaving **RSN** p206
Coplanar coupled lines: the effects of the presence of the lateral ground planes, upper and lower ground planes, and the V-shaped microshield ground walls **MAP** p63
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Distortion analysis of nonlinear systems with memory using maximum-length sequences **CDS** p345
Effects of multipath and antenna on GPS observables **RSN** p267
Electromagnetic scattering from anisotropically coated impedance cylinder **MAP** p163
Entire-domain polynomial approximation of volume currents in the analysis of dielectric scatterers **MAP** p207
Free-wave measurement of permeability and permittivity of ferrites at millimetre-wave frequencies **SMT** p169
Frequency characteristics and bandwidth enhancement of artificially soft and hard surfaces **MAP** p289
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Frequency dependence of backscattered signals from forest components **RSN** p301
General scheme for electromagnetic reflection and transmission for composite structures of complex materials **MAP** p52
Generalised Barker-like PN sequences for quasisynchronous spread-spectrum multiple-access communication systems **COM** p91
High order nonlinearities in HF radar backscatter from the ocean surface **RSN** p293
Multiple scattering by parallel conducting elliptic cylinders: TE case **MAP** p178
Narrowband interference rejection in direct-sequence spread-spectrum system using time-frequency decomposition **COM** p393
New closed-form expression for coupling matrix elements related to scattering from planar periodic single-strip grating **MAP** p492
New polarimetric calibration technique using a single calibration dihedral **MAP** p19
Nonlinear capacitive snubbers for improved zero-voltage switching with reduced electromagnetic interference and minimum voltage stresses **EPA** p329
Optimisation approach to the time-domain electromagnetic inverse problem for a bi-isotropic slab **MAP** p429
Optimum hop length for millimetre wave radio links in an arid climate **MAP** p156
Partially adaptive array design using DOA estimation and null steering **RSN** p1
Power spectral lineshapes of microwave radiation backscattered from sea surfaces at small grazing angles **RSN** p252
Prediction of scintillation effects on satellite communications above 10 GHz **MAP** p102
Ray tracing analysis of the transmission performance of curved FSS **MAP** p193
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Scattering from a wedge with cavity backed apertures in its faces and related configurations: TE case **MAP** p183
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Simplified analysis of coated wire antennas and scatterers **MAP** p14
Study of path inclination effects on performance of LOS microwave links in southern India **MAP** p295
Subspace approach to channel assignment in mobile communication networks **COM** p179
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106
Transient currents on lightning protection systems due to the indirect lightning effect **SMT** p213

ELECTROMAGNETISM

Analysis of electromagnetic scattering by artificially soft discs **MAP** p399
Analytical modelling of variable-reluctance machine magnetisation characteristics **EPA** p14
Application of the transmission line matrix method to the analysis of scattering by three-dimensional objects **MAP** p319
Charge images in a dielectric sphere **SMT** p142
Computational analysis of scattering by penetrable oblate spheroids using a model of dipoles located in complex space **MAP** p245
Conservative methods in boundary-element calculations of static fields **SMT** p151
Covariances and invariances of the Beltrami-Maxwell postulates **SMT** p262
Current limiting properties of an expanding helical arc **SMT** p201
Design of slotless TORUS generators with reduced voltage regulation **EPA** p337
Direct-phase modelling of isolated brushless exciter-alternator unit including the magnetic nonlinearities **EPA** p206
Eddy-current effects in slot-bound conductors **EPA** p131
Eddy current iron losses in axially laminated brushless motors **EPA** p183
Electromagnetic boundary conditions and differential forms **MAP** p326
Electromagnetic scattering from anisotropically coated impedance cylinder **MAP** p163
Entire-domain polynomial approximation of volume currents in the analysis of dielectric scatterers **MAP** p207
Experimental validation of a numerical model of busbar systems **GTD** p65
Finite-element variational formulation of the impedance boundary condition for solving eddy current problems **SMT** p293
Free-wave measurement of permeability and permittivity of ferrites at millimetre-wave frequencies **SMT** p169
General approach to prove the existence and uniqueness of the solution in vector potential formulations of 3-D eddy current problems **SMT** p299
General scheme for electromagnetic reflection and transmission for composite structures of complex materials **MAP** p52
Impedance boundary conditions for anisotropic bodies **MAP** p89
Induction coil guns for hypervelocities **EPA** p215
Magnetic fields from transmission lines: comparison of calculations and measurements **GTD** p481
Multicomponents discrete propagation model of forest **MAP** p201
Multiple scattering by parallel conducting elliptic cylinders: TE case **MAP** p178
New closed-form expression for coupling matrix elements related to scattering from planar periodic single-strip grating **MAP** p492
New transducerless magnetic suspension system **SMT** p255
Numerical modelling and simulation of hysteresis effects in magnetic cores using transmission-line modelling and the Preisach theory **EPA** p57
Optimisation approach to the time-domain electromagnetic inverse problem for a bi-isotropic slab **MAP** p429
Origin, location, magnitude and consequences of recoil in the plasma armature railgun **SMT** p197
Partial discharge detection: theoretical and practical aspects **SMT** p29
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Scattering from a wedge with cavity backed apertures in its faces and related configurations: TE case **MAP** p183
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
T-Ω method using hierarchal edge elements **SMT** p133
Time-stepping finite element analysis for a synchronous generator feeding a rectifier load **EPA** p50
Transformer for multimegahertz power applications **EPA** p379

ELECTRON TUBES

Electric arc temperature estimation of a fibre splicer **OPT** p313

ELECTRIC VARIABLES CONTROL

Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Combined active reactive despatch. Part 2: test results **GTD** p401
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Line conditioning system with simple control strategy and fast dynamic response **GTD** p128
Modelling and control of thyristor-controlled series compensators **GTD** p297
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185

PWM control method for a four-level inverter **EPA** p390
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reactive reserve management **GTD** p17
Robust control of series parallel resonant converters **CTA** p401
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Simplified control strategy to improve AC-input-current waveform of parallel-connected current-type PWM rectifiers **EPA** p246
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Techniques for ASIC implementation of vector control **CDT** p318
Three-phase four wire voltage controlled AC line conditioner with unity input power factor and minimised output voltage harmonics **EPA** p43
Three-phase multifunctional battery energy storage system **EPA** p275
Transformerless four-wire PWM rectifier and its application in AC-DC-AC converters **EPA** p410
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449

ELECTRONIC CIRCUITS

Efficient height reduction over-the-cell channel router **CDT** p293
Excitation of thick-film resonant sensor structures **SMT** p244
Fabrication of a thick film sensor employing an ultrasonic oscillator **SMT** p249
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Statistical process control: examination of use in a small printed circuit board manufacturer **SMT** p463

ENERGY CONVERSION

Design of a semiconductor thermoelectric generator for remote subsea wellheads **EPA** p65
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Maximum photovoltaic power tracking: an algorithm for rapidly changing atmospheric conditions **GTD** p59
Optimal battery energy storage system (BESS) charge scheduling with dynamic programming **SMT** p453
Three-phase multifunctional battery energy storage system **EPA** p275

EPITAXIAL GROWTH

Investigation of GaAs homojunction bipolar transistor with delta doping emitter structure **CDS** p406
New complex-coupled DFB-laser with a contacted surface grating for λ=1.55 μm **OPT** p162

EXPERT SYSTEMS

Artificial intelligence-based machine-learning system for thermal generator scheduling **GTD** p195
Design support based on projection of information across the product-development life cycle by means of case-based reasoning **SMT** p345
Expert system for the optimum design of measurement systems **SMT** p330
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Hierarchical planning using abstraction **CTA** p197
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Hybrid knowledge-based system/multilayer perceptron approach for the post-assembly tuning of electronic filters **CDS** p277
Hybrid method for systems analysis **SMT** p350
Model integration within a manufacturing simulation framework **CTA** p216
Power-demand forecasting using a neural network with an adaptive learning algorithm **GTD** p560
Process for diagnostic reasoning integrating uncertain and temporal information **CTA** p575
Reactive reserve management **GTD** p17
Rule-based variable-gain power system stabiliser **GTD** p29
Structured methodology for the selection and effective implementation of manufacturing control systems **SMT** p411

FEEDBACK

Adaptive frequency hopping in HF communications **COM** p99
Application of decoupling method to Hamiltonian systems **CTA** p595
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Efficient pole placement technique for linear time-variant SISO systems **CTA** p451
Guaranteed cost LQG control of uncertain linear systems **CTA** p95
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Parametric approach for eigenstructure assignment in descriptor systems via output feedback **CTA** p611
Performance-bound analysis of the new DS/SSMA protocol for wireless data networks **COM** p255
Polynomial solution of the standard H_∞ control problem for strip mill gauge control **CTA** p515
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Stable and fast neurocontroller for robot arm movement **CTA** p378

FIBRE LASERS

Novel laser intersatellite communication system employing optically preamplified PPM receivers **COM** p15
Performance and optimal presynchronisation filtering for direct-detection optical fibre PPM **OPT** p259
Signal self-restoration characteristic and bit error rate performance of terrestrial cascaded erbium doped fibre amplifier systems **OPT** p94

FIBRE OPTICS

Analysis of couplers composed of a fibre half-block with a slab overlay: effects of curvature of the fibre and asymmetry of the slab waveguide **OPT** p176
Backscatter-induced noise and crosstalk in a FDM multidimensional gyro system using two bias modulators in each gyro loop **OPT** p253
Bandwidth requirements for bit-sequence codes used in fibre optic multiplexing systems **OPT** p202
Electric arc temperature estimation of a fibre splicer **OPT** p313
Generalised analysis of double-coupler doubly-resonant optical circuit **OPT** p296
In line fibre optic electric field sensing technique without interruption of the fibre **SMT** p109
Optimisation of wavelength spacing in a WDM transmission system in the presence of fibre nonlinearities **OPT** p190
Systematic method for the analysis of optical fibre circuits **OPT** p165

FILTERS AND FILTERING

Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Efficient design of ladder-based transconductor-capacitor filters and equalisers **CDS** p263
Generalised frequency response as applied to circuits with time varying elements **CDS** p217
Hybrid knowledge-based system/multilayer perceptron approach for the post-assembly tuning of electronic filters **CDS** p277
Insensitive voltage-mode and current-mode filters from transimpedance opamps **CDS** p140
New dynamic filter based on least absolute value algorithm for on-line tracking of power system harmonics **GTD** p37
Novel slow-wave structure for narrow-band quasi-transversal filters **MAP** p389
Parasitic-capacitance-insensitive current-mode filters using operational transresistance amplifiers **CDS** p186
Performance comparison of the three-phase active-power-filter algorithms **GTD** p646
Simple allpass sections with complex poles and zeros **CDS** p273
Square-rooting and vector summation circuits using current conveyors **CDS** p223
Synthesis and RC-active simulation of an LR terminated LC filter **CDS** p49
Three-phase multifunctional battery energy storage system **EPA** p275
Transformation of sinusoidal oscillators using universal active elements **CDS** p353
Unified theory of compatible impedances **CDS** p15
Universal linear voltage-controlled-impedance configuration **CDS** p208
Waveguide bandpass filter of millimetre waves using polycrystalline yttrium iron garnet **MAP** p251

FORMAL LOGIC

Fuzzy model based fault diagnosis **CTA** p545
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Linguistic fuzzy model identification **CTA** p537

FUZZY CONTROL

Anticipatory fuzzy control of power systems **GTD** p211
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic control of an automotive suspension system **CTA** p149
Fuzzy logic power system stabiliser **GTD** p277
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397

GENERATORS

Adapting a linear induction motor for the acceleration of large masses to high velocities **EPA** p262
An approach to partial-discharge investigation by height-distribution analysis **SMT** p102
Analysis and simulation of the high-speed torque performance of brushless DC motor drives **EPA** p191
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Contactless measurement of the secondary position in linear reluctance motors **EPA** p355
Design of slotless TORUS generators with reduced voltage regulation **EPA** p337
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Eddy-current effects in slot-bound conductors **EPA** p131
Eddy current iron losses in axially laminated brushless motors **EPA** p183
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Experimental investigations of high-voltage motor switching surges **GTD** p233
Identification of coherent generators by spectrum analysis **GTD** p367
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Induction coil guns for hypervelocities **EPA** p215
LKF based robust control of electrical servodrives **EPA** p161
Method for analysing the commutation in small universal motors **EPA** p123
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Position control of a brushless DC motor without velocity measurements **EPA** p113
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

INDUCTION MOTORS

Adapting a linear induction motor for the acceleration of large masses to high velocities **EPA** p262
Design and application of extended observers for joint state and parameter estimation in high-performance AC drives **EPA** p71
Generalised approach to the analysis of asymmetrical three-phase induction motors **EPA** p87
Impact on the power system of single-phase input cycloconvertor motor drives **EPA** p176
Induction coil guns for hypervelocities **EPA** p215
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple wind farm dynamic model **GTD** p545
'Variable inertia test' for full load temperature rise testing of induction machines **EPA** p222

INFORMATION THEORY

2-D multitarget angle tracking algorithm using sensor array **RSN** p158
Adaptive eigen-subspace algorithms for tracking suddenly disappearing sources **RSN** p277
Adaptive instrumental variable method for robust direction-of-arrival estimation **RSN** p45
Adaptive interacting multiple model algorithm for tracking a manoeuvring target **RSN** p11
'Almost blind' signal estimation using second-order moments **RSN** p213
Analytical approach to changepoint detection in Laplacian noise **VIS** p174
Aperiodic autocorrelation of Frank sequences **COM** p210
Approximating multirate estimation **VIS** p232
AR modelling of skewed signals using third-order cumulants **VIS** p78
Bearings-only tracking using a set of range-parameterised extended Kalman filters **CTA** p73
Bias and variance calculation of a principal component based frequency estimator **VIS** p247
C-RISE algorithm for eigendecomposition of Hermitian pencils **RSN** p97
Centralised integration of multisensor noisy and fuzzy data **CTA** p459
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Control system design issues for unstable linear systems with saturated inputs **CTA** p335
Design of FIR filters with extra constraints using modified LMS algorithm **VIS** p237
Design of multilevel multiharmonic signals for system identification **CTA** p247
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Extended analysis of word synchronisation using sequence correlation techniques **COM** p357
Fast approximate maximum likelihood algorithm for single source localisation **RSN** p232
Fast computation of the two-dimensional generalised Hartley transforms **VIS** p35
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Fractional central moment method for movement-invariant object classification **VIS** p213
Generating piecewise-constant excitations with an arbitrary power spectrum **CTA** p241
Identification and dynamic weights for LQG control with integral action **CTA** p647
Identifying linear models of systems suffering nonlinear distortions, with a gas turbine application **CTA** p229
Joint phase and envelope densities of a higher order **RSN** p123
Linear adaptive decorrelator for signal separation **VIS** p327
Maximum likelihood estimation of signal power in sensor array in the presence of unknown noise field **RSN** p218
Method for array calibration in high-resolution sensor array processing **RSN** p90
Minimax design of two-dimensional parallelogram filter banks **VIS** p220
Mobile vehicle navigation in unknown environments: a multiple hypothesis approach **CTA** p385
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Neural network approach to signal modelling in power systems **CTA** p257
New class of t-error correcting and all unidirectional error detecting (t-EC/AUED) codes **CDT** p32
New transform using the Mersenne numbers **VIS** p381
Optimal sampling interval for system identification based on decimation and interpolation **CTA** p15
Parallel-decomposition algorithm for discrete computational problems and its application in developing an efficient discrete convolution algorithm **VIS** p40
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Pulse arrival time estimation based on pulse sample ratios **RSN** p153
Realisation of morphological operations **CDS** p364
Recursive procedures for constrained optimisation problems and its application in signal processing **VIS** p161
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions **CDT** p325
Semi-analytical recursive algorithms for convolution calculations **CDS** p125
Simultaneous frequency and direction estimation from parallel-array data **RSN** p6
Skew-circular/circular correlation decomposition of prime-factor DCT **VIS** p241
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181
Theoretical performance of a multisensor track-to-track correlation technique **RSN** p281
Two-dimensional minimum free energy spectral estimation **VIS** p169
Unusual-length number-theoretic transforms using recursive extensions of Rader's algorithm **VIS** p31
Very low-bit-rate segmentation-based video coding using contour and texture prediction **VIS** p253

INSTRUMENTATION AND MEASUREMENT

Backscatter-induced noise and crosstalk in a FDM multidimensional gyro system using two bias modulators in each gyro loop **OPT** p253
Bandwidth requirements for bit-sequence codes used in fibre optic multiplexing systems **OPT** p202
Computer-aided transducer calibration system for a practical power system **SMT** p459
Electric arc temperature estimation of a fibre splicer **OPT** p313
Excitation of thick-film resonant sensor structures **SMT** p244
Expert system for the optimum design of measurement systems **SMT** p330
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
In line fibre optic electric field sensing technique without interruption of the fibre **SMT** p109
Limitations in acousto-optic FM demodulators **OPT** p149
Modal analysis of PbSe-clad optical waveguides **OPT** p183
Modelling of gas-sensitive conducting polymer devices **CDS** p321
Optical fibre investigation of the arc dynamics of a spiral arc current limiting interrupter **GTD** p608
Optical-fibre monitoring of high frequency parasitic arcs in a puffer circuit breaker **SMT** p469
Partial discharge plant-monitoring technology: present and future developments **SMT** p4
Systematic method for the analysis of optical fibre circuits **OPT** p165

INSULATED GATE FIELD EFFECT TRANSISTORS

Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Application of a CMOS current mode approach to on-chip current sensing in smart power circuits **CDS** p357
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
Losses in PWM inverters using IGBTs **EPA** p285
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Single-phase switch-mode rectifier employing voltage-reversal circuit switched with a fixed frequency **EPA** p154
Temperature-induced rebound in Al-gate NMOS transistors **CDS** p413

INSULATORS AND INSULATION

Effect of barriers on tree growth in solid insulation **SMT** p283
Experimental investigations of high-voltage motor switching surges **GTD** p233
Measurements of void gas pressure during combined thermal and partial discharge ageing of epoxy **SMT** p17
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Optical-fibre monitoring of high frequency parasitic arcs in a puffer circuit breaker **SMT** p469
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge pulse distribution pattern analysis **SMT** p46
Physical and chemical aspects of partial discharges and their effects on materials **SMT** p11
Water treeing in insulating liquids **SMT** p157

INTEGRATED CIRCUITS

8 Gbit/s GaAs-on-InP 1.3 μm wavelength OEIC transmitter **OPT** p13
Analysis and modelling of parasitic substrate coupling in CMOS circuits **CDS** p307
Comparative study on electrical performance of normal and superconducting multiconductor lines for high-speed interconnects and uniplanar MICs **MAP** p71
Comparison between MMIC matrix and distributed amplifiers **MAP** p75
Design and analysis of a 0.6 V-operating merged CMOS-bipolar SRAM cell **CDS** p369
Design and VLSI implementation of an address generation coprocessor **CDT** p145
Effects of response quantisation on the accuracy of transient response test results **CDS** p334
FIDIAS: an integral approach to high-level synthesis **CDS** p227
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Full-swing high speed CBiCMOS digital circuit for low-voltage applications **CDS** p8
Functionally separated, multiple-valued content-addressable memory and its applications **CDS** p165
High-level synthesis of data paths for easy testability **CDS** p209
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Layout driven logic synthesis system **CDS** p158
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Manifestations of faults in single- and double-BJT BiCMOS logic gates **CDT** p135
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
Optimisation of high-performance gates in AlGaAs/GaAs quantum-well technology **CDS** p394
Orientation assignment of standard cells using a fuzzy mathematical transformation **CDT** p157
Parasitic-capacitance-insensitive current-mode filters using operational transresistance amplifiers **CDS** p186

INTEGRATED OPTICS

Analysis of couplers composed of a fibre half-block with a slab overlay: effects of curvature of the fibre and asymmetry of the slab waveguide **OPT** p176
Analysis of optical directional couplers composed of asymmetrically curved waveguides **OPT** p305
Determination of refractive indices and thicknesses of silica double layer slab waveguides on silicon **OPT** p241
Effect of roughness and inhomogeneity on evanescent single-mode optical couplers **OPT** p288
Exact and variational Fourier transform methods for analysis of multilayered planar waveguides **OPT** p66
Generalised analysis of double-coupler doubly-resonant optical circuit **OPT** p296
Mode behaviour on bent planar dielectric waveguides **OPT** p115
Proposal for high extinction ratio $LiNbO_3$ optical waveguide cutoff modulator **OPT** p248
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Ultrasmall waveguide bends: the corner mirrors of the future? **OPT** p61

INTEGRATED OPTOELECTRONICS

8 Gbit/s GaAs-on-InP 1.3 μm wavelength OEIC transmitter **OPT** p13

INTERFERENCE SUPPRESSION

Adaptive frequency hopping in HF communications **COM** p99
Adaptive null formation with a reconfigurable reflector antenna **MAP** p220
Control of the spectra of DS-SS split signals by interleaving **RSN** p206
Coplanar coupled lines: the effects of the presence of the lateral ground planes, upper and lower ground planes, and the V-shaped microshield ground walls **MAP** p63
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Distortion analysis of nonlinear systems with memory using maximum-length sequences **CDS** p345
Effects of multipath and antenna on GPS observables **RSN** p267
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
Generalised Barker-like PN sequences for quasisynchronous spread-spectrum multiple-access communication systems **COM** p91
Narrowband interference rejection in direct-sequence spread-spectrum system using time-frequency decomposition **COM** p393
Nonlinear capacitive snubbers for improved zero-voltage switching with reduced electromagnetic interference and minimum voltage stresses **EPA** p329
Partially adaptive array design using DOA estimation and null steering **RSN** p1
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Subspace approach to channel assignment in mobile communication networks **COM** p179
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106
Transient currents on lightning protection systems due to the indirect lightning effect **SMT** p213

ISDN

New approach for traffic characterisation in ATM networks **COM** p87
Proposed UPC meeting both packet video and network goals **COM** p227

LASER MODES

Performance and optimal presynchronisation filtering for direct-detection optical fibre PPM **OPT** p259
Simulation of enhanced plasma effect wavelength tunable lasers **OPT** p55
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Study of carrier transport effects on quantum well lasers using a SPICE simulator **OPT** p237
Wavelength and polarisation switching in InGaAsP/InP DFB lasers **OPT** p51

LASERS

Analysis of corrugated quantum well structures for laser applications **OPT** p2
Cavity and reflector design for vertical cavity surface emitting lasers **OPT** p37
Current modulation and transient dynamics of single-mode semiconductor lasers under different feedback conditions **OPT** p17
Effects of lateral modes on the static and dynamic behaviour of buried heterostructure DFB lasers **OPT** p97
New complex-coupled DFB-laser with a contacted surface grating for λ=1.55 μm **OPT** p162
Novel laser intersatellite communication system employing optically preamplified PPM receivers **COM** p15
Numerical analysis of transverse mode in gain-guided vertical cavity surface emitting lasers **OPT** p29
Signal self-restoration characteristic and bit error rate performance of terrestrial cascaded erbium doped fibre amplifier systems **OPT** p94
Simulation of enhanced plasma effect wavelength tunable lasers **OPT** p55
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Single mode power and modal behaviour in buried vertical-cavity surface-emitting lasers **OPT** p87
Theoretical analysis of the influence of the barrier composition on properties of GaInAs/GaInAsP/GaInP laser diodes **OPT** p5
Thermal modelling of vertical-cavity surface-emitting lasers using the finite-element method **OPT** p82
Travelling wave semiconductor laser amplifier detector noise characteristics **OPT** p23
VCSEL diffraction-loss theory **OPT** p77
Wavelength and polarisation switching in InGaAsP/InP DFB lasers **OPT** p51

LINEAR NETWORK ANALYSIS

High-gain microwave amplifier tuneable over a decade bandwidth **MAP** p489
Modified determinations of stability criteria for accurate design of the linear two-port amplifiers **MAP** p192
Transformer matrix of some transmission lines topologies **CDS** p21
Waveform relaxation analysis of lossy coupled transmission line sets in cascade **CDS** p373

LOGIC AND SWITCHING CIRCUITS

AC characterisation of the p inverted buried channel heterostructure FET and its suitability for complementary electronics **CDS** p105
Anatomy of a simulation backplane **CDT** p377
Concurrent error detection in array multipliers by BIDO **CDT** p425
Design and test generation of C-testable high-speed carry-free dividers **CDT** p193
Designing asynchronous sequential circuits for random pattern testability **CDT** p299
Distributed fault simulation for sequential circuits by pattern partitioning **CDT** p287
Effects of technology mapping on fault-detection coverage in reprogrammable FPGAs **CDT** p407
Efficient computation of quaternary fixed polarity Reed-Muller expansions **CDT** p345
Efficient global strategy for designing and testing scanned sequential circuits **CDT** p170
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions **CDT** p249
Frequency dependence of AC-interference susceptibility in digital ICs **SMT** p183
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Layout driven logic synthesis system **CDS** p158
Manifestations of faults in single- and double-BJT BiCMOS logic gates **CDT** p135
Multiple-inputs systolic priority queue for fast sequential decoding of convolutional codes **CDS** p282
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
New approach for the ordering of gate permutation in one-dimensional logic arrays **CDS** p90
Optimisation of high-performance gates in AlGaAs/GaAs quantum-well technology **CDS** p394
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation **CDT** p49
Synthesis of multioutput logic networks using spectral techniques **CDT** p241
Technique to minimise area overhead for delay-driven clustering **CDT** p401
Test time reduction for scan-designed circuits by sliding compatibility **CDT** p41
Two's-complement fast serial-parallel multiplier **CDS** p41
VLSI architectures for computing X mod m **CDS** p313

LOGIC DESIGN

Anatomy of a simulation backplane **CDT** p377
Design and test generation of C-testable high-speed carry-free dividers **CDT** p193
Designing asynchronous sequential circuits for random pattern testability **CDT** p299
Distributed fault simulation for sequential circuits by pattern partitioning **CDT** p287
Efficient functional verification algorithm for Petri-net-based parallel controller designs **CDT** p255
Efficient global strategy for designing and testing scanned sequential circuits **CDT** p170
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions **CDT** p249
Efficient state encoding algorithm based on hypercube construction **CDT** p225
FIDIAS: an integral approach to high-level synthesis **CDS** p227
High-level synthesis of data paths for easy testability **CDS** p209
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Issues in the design of a logic simulator: an improved caching technique for event-queue management **CDS** p293
Layout driven logic synthesis system **CDS** p158
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Manifestations of faults in single- and double-BJT BiCMOS logic gates **CDT** p135
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
New approach for the ordering of gate permutation in one-dimensional logic arrays **CDS** p90
Non-exhaustive method for identification of optimal variable orderings in the decomposition of complex logic functions **CDT** p373
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation **CDT** p49
Synthesis of multioutput logic networks using spectral techniques **CDT** p241
Technique to minimise area overhead for delay-driven clustering **CDT** p401
Test time reduction for scan-designed circuits by sliding compatibility **CDT** p41
VLSI architectures for computing X mod m **CDS** p313
Weighted BIST structures in the arithmetic unit of a communication processor **CDT** p360

MAGNETIC MATERIALS AND DEVICES

Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Chaotic ferroresonance in power transformers **GTD** p247
Conceptual design of air-core superconducting transformer for 500 kV cable transmission system **GTD** p487
Design of slotless TORUS generators with reduced voltage regulation **EPA** p337
Free-wave measurement of permeability and permittivity of ferrites at millimetre-wave frequencies **SMT** p169
Frequency characteristics and bandwidth enhancement of artificially soft and hard surfaces **MAP** p289
Numerical modelling and simulation of hysteresis effects in magnetic cores using transmission-line modelling and the Preisach theory **EPA** p57
Relevance of step-lap joints for magnetic characteristics of transformer oores **EPA** p371
'Shift and add' property of m-sequences and its application to channel characterisation of digital magnetic recording **COM** p135
Transformer for multimegahertz power applications **EPA** p379
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449
Waveguide bandpass filter of millimetre waves using polycrystalline yttrium iron garnet **MAP** p251

MATERIALS AND MATERIALS TESTING

General scheme for electromagnetic reflection and transmission for composite structures of complex materials **MAP** p52
Modelling of gas-sensitive conducting polymer devices **CDS** p321
Resonance properties of cylindrical rectangular patch with composite ground plane **MAP** p307
Shape classification of flaw indications in three-dimensional ultrasonic images **SMT** p307

MATHEMATICAL TECHNIQUES

2-D multitarget angle tracking algorithm using sensor array **RSN** p158
Adaptive instrumental variable method for robust direction-of-arrival estimation **RSN** p45
Advances in global optimisation for generation expansion planning **GTD** p423
'Almost blind' signal estimation using second-order moments **RSN** p213
Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis of electromagnetic scattering by artificially soft discs **MAP** p399
Analytical approach to changepoint detection in Laplacian noise **VIS** p174
Bearings-only tracking using a set of range-parameterised extended Kalman filters **CTA** p73

Bias and variance calculation of a principal component based frequency estimator **VIS** p247
BPD computation and model reference adaptive control (MRAC) of Hammerstein plants **CTA** p475
Building irregular pyramids by dual-graph contraction **VIS** p366
Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Centralised integration of multisensor noisy and fuzzy data **CTA** p459
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Conservative methods in boundary-element calculations of static fields **SMT** p151
Constrained optimisation procedure for evaluating cyclic loading of power transformers **GTD** p240
Construction of optimal frequency hopping sequences for minimising bit errors in selective fading channels characteristic to digital cellular systems **COM** p271
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Corrective action planning to achieve a feasible optimal power flow solution **GTD** p576
Cost-performance analysis of cascaded crossbar interconnected multiprocessors **CDT** p117
Curve segmentation and representation by superellipses **VIS** p280
Decoding the ternary (23, 12, 8) quadratic residue code **COM** p129
Design of FIR filters with extra constraints using modified LMS algorithm **VIS** p237
Detection of Jacobian singularity and network islanding in power flow computations **GTD** p589
Development of simple orthogonal transforms for image compression **VIS** p22
Digital interval model conversion and simulation of continuous-time uncertain systems **CTA** p315
Direct neural model reference adaptive control **CTA** p31
Direct-phase modelling of isolated brushless exciter-alternator unit including the magnetic nonlinearities **EPA** p206
Discharge pattern recognition in high voltage equipment **SMT** p51
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Dynamic polling orders in multiserver multiqueue systems **COM** p75
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Efficient computation of quaternary fixed polarity Reed-Muller expansions **CDT** p345
Efficient computation of rodbed grounding resistance in a homogeneous earth by Galerkin's moment method **GTD** p653
Efficient CORDIC-based systolic architectures for the discrete Hartley transform **CDT** p201
Efficient functional verification algorithm for Petri-net-based parallel controller designs **CDT** p255
Efficient methods for identifying weak nodes in electrical power networks **GTD** p317
Efficient pole placement technique for linear time-variant SISO systems **CTA** p451
Electromagnetic scattering from anisotropically coated impedance cylinder **MAP** p163
Entire-domain polynomial approximation of volume currents in the analysis of dielectric scatterers **MAP** p207
Estimation of complex Fourier coefficients **CTA** p253
Experimental validation of a numerical model of busbar systems **GTD** p65
Fast approximate maximum likelihood algorithm for single source localisation **RSN** p232
Finite-element variational formulation of the impedance boundary condition for solving eddy current problems **SMT** p293
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Frequency domain technique for designing stabilisers for a power plant with identical generators **GTD** p330
Frequency-independent circuit model of earth return effects in transmission systems **GTD** p143
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
Fuzzy neural networks for time-series forecasting of electric load **GTD** p535
Fuzzy-set approach to dynamic voltage security assessment **GTD** p190
General class of non-Gaussian coherent clutter models **RSN** p61
General scheme for electromagnetic reflection and transmission for composite structures of complex materials **MAP** p52
Generalised scheme for optimal learning in recurrent neural networks **VIS** p71
Generic circuit response interpolation for robust design **CDS** p131
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor **CDT** p81
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Guaranteed cost LQG control of uncertain linear systems **CTA** p95
H_∞ optimisation-based power system stabiliser design **GTD** p179
Helicopter flight control using individual channel design **CTA** p58
Hierarchical line extraction **VIS** p7
High-level synthesis of data paths for easy testability **CDS** p209
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
HVDC convertor waveform distortion: a frequency-domain analysis **GTD** p88
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Hybrid method for systems analysis **SMT** p350
Hydro-dominated short-term hydrothermal scheduling via a hybrid simulation-optimisation approach: a case study **GTD** p569
Identification of coherent generators by spectrum analysis **GTD** p367
Impedance boundary conditions for anisotropic bodies **MAP** p89
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis **CDT** p65
Isolated Mandarin syllable recognition using segmental features **VIS** p59
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p445
Joint phase and envelope densities of a higher order **RSN** p123
Layout driven logic synthesis system **CDS** p158
Linearly pulse-width modulated block pulse functions and their application to linear SISO feedback control system identification **CTA** p44
Linguistic fuzzy model identification **CTA** p537
Low-frequency suppression of baseband coded sequences **COM** p49
Maximum likelihood estimation of signal power in sensor array in the presence of unknown noise field **RSN** p218
Minimax design of two-dimensional parallelogram filter banks **VIS** p220
Mode filtering to reduce ultrasound speckle for feature extraction **VIS** p87
Modelling and numerical solution of multibranched DC rail traction power systems **EPA** p323
Multifrequency Routh approximants for linear systems **CTA** p351
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Multiple scattering by parallel conducting elliptic cylinders: TE case **MAP** p178
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Multivariable cluster analysis for high-speed industrial machinery **SMT** p417
Multivariable system simplification using moment matching and optimisation **CTA** p103
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
Network-growth approach to design of feedforward neural networks **CTA** p486
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Neural network load-flow **GTD** p51
Neural network modelling of a 200 MW boiler system **CTA** p529
New approach for the ordering of gate permutation in one-dimensional logic arrays **CDS** p90
New closed-form expression for coupling matrix elements related to scattering from planar periodic single-strip grating **MAP** p492
New dynamic filter based on least absolute value algorithm for on-line tracking of power system harmonics **GTD** p37
New polarimetric calibration technique using a single calibration dihedral **MAP** p19
New transform using the Mersenne numbers **VIS** p381
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Novel analogue CMOS defuzzification circuit **CDS** p173
Online PCBN tool failure monitoring system based on acoustic emission signatures **SMT** p404
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimal battery energy storage system (BESS) charge scheduling with dynamic programming **SMT** p453
Optimal choice of fixed and switched capacitors in radial distributors with distorted substation voltage **GTD** p24
Optimal design of a finite-buffer polling network with mixed service discipline and general service order sequence **COM** p1
Optimal-power-flow solution by Newton's method applied to an augmented Lagrangian function **GTD** p33
Optimal pricing of transmission services: application to large power systems **GTD** p263
Optimal sampling interval for system identification based on decimation and interpolation **CTA** p15
Optimisation approach to the time-domain electromagnetic inverse problem for a bi-isotropic slab **MAP** p429
Optimising a high-speed serial/parallel sum-of-products hardware structure with respect to bus utilisation **CDT** p77
Optimising individual control rules and multiple communicating rule-based control systems with parallel distributed genetic algorithms **CTA** p211
Optimising the time to solution in electrical impedance tomography **SMT** p433
Optimum carrier lifetime of semiconductor substrate in optoelectronic microwave grating structures **OPT** p197
Orientation assignment of standard cells using a fuzzy mathematical transformation **CDT** p157
Parallel controller synthesis using Petri nets **CDT** p263
Parallel-decomposition algorithm for discrete computational problems and its application in developing an efficient discrete convolution algorithm **VIS** p40
Parallel resonant converter as a circuit simulation primitive **CDS** p379
Parametric approach for eigenstructure assignment in descriptor systems via output feedback **CTA** p611
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge pulse distribution pattern analysis **SMT** p46
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Polynomial solution of the standard H_∞ control problem for strip mill gauge control **CTA** p515
Private investment in power and deviations from the least cost expansion plan **GTD** p269
Radar tomography for the generation of three-dimensional images **RSN** p54
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reconfiguration of radial distribution networks: application of heuristic methods on large-scale networks **GTD** p631
Recursive procedures for constrained optimisation problems and its application in signal processing **VIS** p161
Review of modelling techniques and tools for decision making in manufacturing management **SMT** p371
Routing and performance of the double tree (DOT) network **CDT** p93
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Scattering from a wedge with cavity backed apertures in its faces and related configurations: TE case **MAP** p183
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Scheduling and optimisation for heating of steel soaking pits: case study for hybrid systems **SMT** p362
Security-constrained multiobjective generation dispatch using bicriterion global optimisation **GTD** p406
Skew-circular/circular correlation decomposition of prime-factor DCT **VIS** p241
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181
Solution of the bilinear matrix equation using Astrom-Jury-Agniel algorithm **CTA** p603
Spatial bounding of complex CSG objects **CDT** p431
Speaker recognition using hidden Markov models, dynamic time warping and vector quantisation **VIS** p313
State assignment of finite state machines using a genetic algorithm **CDT** p279
Subspace approach to channel assignment in mobile communication networks **COM** p179
Super-resolution range-Doppler imaging **RSN** p25
System identification using partitioned least squares **CTA** p223
Team algorithms in distributed load flow computations **GTD** p583
Theoretical performance of a multisensor track-to-track correlation technique **RSN** p281
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372

Thresholding based on histogram approximation **VIS** p271
Transformer matrix of some transmission lines topologies **CDS** p21
Two-dimensional median filter algorithm for parallel reconfigurable computers **VIS** p345
Unified theory of compatible impedances **CDS** p15
Unit commitment by parallel simulated annealing **GTD** p595

MEASUREMENT OF SPECIFIC VARIABLES

Algorithm for determining phase-angle observability in the presence of line-current-magnitude measurements **GTD** p453
Analytic solution of the forward problem for induced current electrical impedance tomography systems **SMT** p425
Contactless measurement of the secondary position in linear reluctance motors **EPA** p355
Determination of refractive indices and thicknesses of silica double layer slab waveguides on silicon **OPT** p241
Development and application of a 10 MHz digital system for current-zero measurements **SMT** p125
Direction finding system using symmetric-pair antenna arrays **RSN** p130
Directivity of acoustic signals from partial discharges in oil **SMT** p85
Distortion analysis of nonlinear systems with memory using maximum-length sequences **CDS** p345
Electric arc temperature estimation of a fibre splicer **OPT** p313
Excitation of thick-film resonant sensor structures **SMT** p244
Expert system for the optimum design of measurement systems **SMT** p330
Fabrication of a thick film sensor employing an ultrasonic oscillator **SMT** p249
Free-wave measurement of permeability and permittivity of ferrites at millimetre-wave frequencies **SMT** p169
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
High Q-factor open resonator measurement system for 94 GHz waveband applications **MAP** p414
In line fibre optic electric field sensing technique without interruption of the fibre **SMT** p109
Limitations in acousto-optic FM demodulators **OPT** p149
Magnetic fields from transmission lines: comparison of calculations and measurements **GTD** p481
Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136
Measurements of void gas pressure during combined thermal and partial discharge ageing of epoxy **SMT** p17
Modelling and analysis of electrically conducting vessels and pipelines in electrical resistance process tomography **SMT** p313
Modelling of gas-sensitive conducting polymer devices **CDS** p321
Multicomponents discrete propagation model of forest **MAP** p201
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Optical fibre investigation of the arc dynamics of a spiral arc current limiting interrupter **GTD** p608
Optical-fibre monitoring of high frequency parasitic arcs in a puffer circuit breaker **SMT** p469
Optimising the time to solution in electrical impedance tomography **SMT** p433
Optimum hop length for millimetre wave radio links in an arid climate **MAP** p156
Partial discharge detection: theoretical and practical aspects **SMT** p29
Partial discharge mechanisms in voids related to dielectric degradation **SMT** p62
Partial discharge plant-monitoring technology: present and future developments **SMT** p4
Partial discharge signal generation transmission and acquisition **SMT** p22
Partial discharges in flat, dielectric/metallic bounded cavities **SMT** p490
Performance and analysis of an aluminium nitride isolation resistor **MAP** p282
Physical and chemical aspects of partial discharges and their effects on materials **SMT** p11
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Q-factor measurement with a scalar network analyser **MAP** p369
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449

MEASUREMENT SCIENCE

Backscattering study on non-orthogonal trihedral corner reflectors **MAP** p441
Computer-aided transducer calibration system for a practical power system **SMT** p459
Method for array calibration in high-resolution sensor array processing **RSN** p90
New polarimetric calibration technique using a single calibration dihedral **MAP** p19
Stereo calibration from correspondences of OTV projections **VIS** p289

MICROWAVE CIRCUITS

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
Comparative study on electrical performance of normal and superconducting multiconductor lines for high-speed interconnects and uniplanar MICs **MAP** p71
Comparison between MMIC matrix and distributed amplifiers **MAP** p75
Determination of the RF-noise source parameters in AlInAs/GaInAs-HEMT heterostructures based on measured noise temperature dependence against electric field **CDS** p339
Experimental investigation of the 'post mount' structure in waveguide-type SIS mixers **MAP** p339
High-gain microwave amplifier tuneable over a decade bandwidth **MAP** p489
Innovative power distributed amplifier using the Wilkinson combiner **MAP** p97

MICROWAVE MEASUREMENT TECHNIQUES

Broadband couplers for UHF detection of partial discharge in gas-insulated substations **SMT** p237
Free-wave measurement of permeability and permittivity of ferrites at millimetre-wave frequencies **SMT** p169
High Q-factor open resonator measurement system for 94 GHz waveband applications **MAP** p414
Performance and analysis of an aluminium nitride isolation resistor **MAP** p282
Q-factor measurement with a scalar network analyser **MAP** p369
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109

MILITARY SYSTEMS

Origin, location, magnitude and consequences of recoil in the plasma armature railgun **SMT** p197

MODULATION

Analytical and measured performance of the combined analogue locked loop universal modulator (CALLUM) **COM** p297
Backscatter-induced noise and crosstalk in a FDM multidimensional gyro system using two bias modulators in each gyro loop **OPT** p253
Bit-error probability of QPSK with noisy phase reference **COM** p292
Channel coding for VSAT systems **COM** p333
Demodulation and decoding for diversity mobile radio systems **COM** p315
Determining the power rating of a multichannel linear amplifier **COM** p274
Diversity for noncoherent DPSK direct-sequence CDMA over a shadowed Rician-fading satellite channel **COM** p386
Effect of roughness and inhomogeneity on evanescent single-mode optical couplers **OPT** p288
Limitations in acousto-optic FM demodulators **OPT** p149
Linearly pulse-width modulated block pulse functions and their application to linear SISO feedback control system identification **CTA** p44
Low-frequency suppression of baseband coded sequences **COM** p49
Maximum entropy and minimum relative entropy in performance evaluation of digital communication systems **COM** p250
Modal analysis of PbSe-clad optical waveguides **OPT** p183
Novel laser intersatellite communication system employing optically preamplified PPM receivers **COM** p15
Performance and optimal presynchronisation filtering for direct-detection optical fibre PPM **OPT** p259
Pre-equaliser cancellation of sinusoidal phase jitter **COM** p216
Reduced-state Viterbi differential detection using a recursively estimated phase reference for M-ary DPSK **COM** p263
Rigorous approach to performance modelling of nonlinear, optically amplified IM/DD systems **OPT** p271
Schemes for equalisation of communication channels with nonlinear impairments **COM** p165
Spectrum shaping in N-channel QPSK-OFDM systems **VIS** p333
System performance implications of homodyne beat noise effects in optical fibre networks **OPT** p143
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106

MODULATORS AND DEMODULATORS

Analytical and measured performance of the combined analogue locked loop universal modulator (CALLUM) **COM** p297
Experimental investigation of the 'post mount' structure in waveguide-type SIS mixers **MAP** p339
Reduced pull-in time of phase-locked loops using a simple nonlinear phase detector **COM** p221

MULTIMEDIA

Methodology for derivation of network resources to support video-related services in ATM-based private wide-area networks **COM** p233
Proposed UPC meeting both packet video and network goals **COM** p227

MULTIPROCESSOR SYSTEMS

A star-based I/O-bounded network for massively parallel systems **CDT** p5
Efficient technique for partitioning and programming linear algebra algorithms on concurrent VLSI architectures **CDS** p97
Fine grain scheduler for shared-memory multiprocessor systems **CDT** p98
Parallel controller synthesis using Petri nets **CDT** p263
Rule-based variable-gain power system stabiliser **GTD** p29

MULTIVARIABLE CONTROL SYSTEMS

Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Helicopter flight control using individual channel design **CTA** p58
Hierarchical planning using abstraction **CTA** p197
Inverse Nyquist array: a quantitative theory **CTA** p23
Linear switching controller convergence **CTA** p329
Linguistic fuzzy model identification **CTA** p537
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Multivariable cluster analysis for high-speed industrial machinery **SMT** p417
Multivariable system simplification using moment matching and optimisation **CTA** p103
Nonlinear control design for a Hammerstein model system **CTA** p277
Partially asynchronous co-state prediction algorithm **CTA** p88
Robust performance design of multivariable control systems **CTA** p7
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Solution of the bilinear matrix equation using Astrom-Jury-Agniel algorithm **CTA** p603
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Variable structure based decentralised adaptive control **CTA** p439

NETWORK ANALYSIS

Approximations of IIR periodically time-varying digital filters **CDS** p387
Generalised frequency response as applied to circuits with time varying elements **CDS** p217
Time-varying two-dimensional state-space structures **CDS** p120

NEURAL NETS

2D optical fully bipolar neural network using colour encoding **OPT** p121
Adaptive control of discrete systems using neural networks **CTA** p526
Anticipatory fuzzy control of power systems **GTD** p211
Application of radial basis function neural network model for short-term load forecasting **GTD** p45
Artificial neural network-based method for transient response prediction **GTD** p323
Associative memory architecture for video compression **CDT** p55
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Developing a neurocompensator for the adaptive control of robots **CTA** p562
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Direct neural model reference adaptive control **CTA** p31
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
Dynamic recurrent neural network for system identification and control **CTA** p307
Fractional central moment method for movement-invariant object classification **VIS** p213
Functionally separated, multiple-valued content-addressable memory and its applications **CDS** p165
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
Fuzzy neural networks for time-series forecasting of electric load **GTD** p535
Generalised scheme for optimal learning in recurrent neural networks **VIS** p71
Hybrid knowledge-based system/multilayer perceptron approach for the post-assembly tuning of electronic filters **CDS** p277
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Network-growth approach to design of feedforward neural networks **CTA** p486
Neural network approach to signal modelling in power systems **CTA** p257
Neural network-based algorithm for power transformer differential relays **GTD** p386
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Neural network load-flow **GTD** p51
Neural network modelling of a 200 MW boiler system **CTA** p529
Novel approach to alternator field winding interturn fault detection **GTD** p97
Novel technology independent neural network approach on device modelling interface **CDS** p74
Parameter estimation of state space models by recurrent neural networks **CTA** p114
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge pulse distribution pattern analysis **SMT** p46
Performance of a neural binary pattern classifier **CDT** p152
Power-demand forecasting using a neural network with an adaptive learning algorithm **GTD** p560
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Shape classification of flaw indications in three-dimensional ultrasonic images **SMT** p307
Signal processing of the contingent negative variation in schizophrenia using multilayer perceptrons and predictive statistical diagnosis **SMT** p269
Stable and fast neurocontroller for robot arm movement **CTA** p378
Super-resolution range-Doppler imaging **RSN** p25

NONELECTRIC VARIABLES CONTROL

Active suspensions: some background **CTA** p123
Bearings-only tracking using a set of range-parameterised extended Kalman filters **CTA** p73
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Friction compensation and robustness issues in force/position controlled manipulators **CTA** p569
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
LKF based robust control of electrical servodrives **EPA** p161
Mobile vehicle navigation in unknown environments: a multiple hypothesis approach **CTA** p385
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Near-optimal productivity control of a continuous bioreactor **CTA** p633
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Optimal path planning for a trolley crane: fast and smooth transfer of load **CTA** p51
Polynomial solution of the standard H_∞ control problem for strip mill gauge control **CTA** p515
Position control of a brushless DC motor without velocity measurements **EPA** p113
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Stable and fast neurocontroller for robot arm movement **CTA** p378
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

NONLINEAR CONTROL SYSTEMS

Application of decoupling method to Hamiltonian systems **CTA** p595
BPD computation and model reference adaptive control (MRAC) of Hammerstein plants **CTA** p475
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Direct neural model reference adaptive control **CTA** p31
Dynamic recurrent neural network for system identification and control **CTA** p307
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Linear switching controller convergence **CTA** p329
Near-optimal productivity control of a continuous bioreactor **CTA** p633
Nonlinear control design for a Hammerstein model system **CTA** p277
Position control of a brushless DC motor without velocity measurements **EPA** p113
Stable and fast neurocontroller for robot arm movement **CTA** p378

NONLINEAR NETWORK ANALYSIS

Multiphase sinusoidal oscillator using the CFOA pole **CDS** p37
Unified relaxation-pseudocircuit approach for analogue-digital fault diagnosis **CDS** p236

NONLINEAR OPTICS

Numerical analysis of transverse mode in gain-guided vertical cavity surface emitting lasers **OPT** p29
Optimisation of wavelength spacing in a WDM transmission system in the presence of fibre nonlinearities **OPT** p190
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Targeting in nonlinear dynamics of laser diodes **OPT** p157
TE waves in circular nonlinear optical antiwaveguide **OPT** p293

NUMERICAL ANALYSIS

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
Adaptive eigen-subspace algorithms for tracking suddenly disappearing sources **RSN** p277
Adaptive null formation with a reconfigurable reflector antenna **MAP** p220
'Almost blind' signal estimation using second-order moments **RSN** p213
Analysis of 3D microwave cavities using hierarchal vector finite elements **MAP** p373
Analysis of a coupled patch antenna with application in personal communications **MAP** p495
Analysis of electromagnetic scattering by artificially soft discs **MAP** p399
Analytical expressions for reflection coefficients of artificially soft and hard surfaces: dielectric slab loaded with a periodic array of strips over a ground plane **MAP** p145
Application of synchronised phasor measurements to real-time transient stability prediction **GTD** p355
Application of the transmission line matrix method to the analysis of scattering by three-dimensional objects **MAP** p319
Approximating multirate estimation **VIS** p232
Approximations of IIR periodically time-varying digital filters **CDS** p387
AR modelling of skewed signals using third-order cumulants **VIS** p78
Boundary-element approach to calculation of wire antenna parameters in the presence of dissipative halfspace **MAP** p435
C-RISE algorithm for eigendecomposition of Hermitian pencils **RSN** p97
Calculating the current distribution in power transformer windings using finite element analysis with circuit constraints **SMT** p231
Calculating the K-distribution by saddlepoint integration **RSN** p162
Chaotic ferroresonance in power transformers **GTD** p247
Coding gain and spatial localisation properties of discrete wavelet transform filters for image coding **VIS** p133
Comparison between a quasistatic space-domain analysis and a full-wave spectral-domain analysis for high-frequency interconnecting crossover in multilayered dielectric media **MAP** p275
Complete scattering parameter characterisation by FDTD method of Y-junction power dividers with small output angles **MAP** p379
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Conservative methods in boundary-element calculations of static fields **SMT** p151
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Corrective action planning to achieve a feasible optimal power flow solution **GTD** p576
Curve segmentation and representation by superellipses **VIS** p280
Cylindrical rectangular microstrip antennas with coplanar parasitic patches **MAP** p300
Decoding the ternary (23, 12, 8) quadratic residue code **COM** p129
Design of a virtual LCR component meter **SMT** p114
Design of FIR filters with extra constraints using modified LMS algorithm **VIS** p237
Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Detection of curved edges at subpixel accuracy using deformable models **VIS** p304
Detection of Jacobian singularity and network islanding in power flow computations **GTD** p589
Direct interpolation method for reducing the non-linearity and quantisation distortion of analogue-to-digital convertors **CDS** p61
Discrete complex image MPIE analysis of coax-fed coupled vertical monopoles in grounded dielectric substrate: two formulations **MAP** p269
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Doppler ambiguity resolution using staggered PRF with a new chirp sweep-rate estimation algorithm **RSN** p191
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Effect of radiative and convective heat transfer on thermal transients in power cables **GTD** p436
Efficient computation of rodbed grounding resistance in a homogeneous earth by Galerkin's moment method **GTD** p653
Efficient CORDIC-based systolic architectures for the discrete Hartley transform **CDT** p201
Efficient methods for identifying weak nodes in electrical power networks **GTD** p317
Efficient technique for partitioning and programming linear algebra algorithms on concurrent VLSI architectures **CDS** p97
Eigensusceptances and eigenreactances of symmetrical waveguide inductive obstacles using the finite element method **MAP** p384
Eigenvalue approach clustering algorithm for building equivalent models of distribution systems **GTD** p282
Electromagnetic scattering from anisotropically coated impedance cylinder **MAP** p163
Entire-domain analysis of thin-wire antennas near or in lossy ground **MAP** p213
Entire-domain polynomial approximation of volume currents in the analysis of dielectric scatterers **MAP** p207
Estimation of complex Fourier coefficients **CTA** p253

Experimental validation of a numerical model of busbar systems **GTD** p65
Fast computation of the two-dimensional generalised Hartley transforms **VIS** p35
Ferroresonant oscillations in capacitor voltage transformers **CDS** p30
Finite-element variational formulation of the impedance boundary condition for solving eddy current problems **SMT** p293
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Fourier descriptor based technique for reconstructing 3D contours from stereo images **VIS** p95
Fractional central moment method for movement-invariant object classification **VIS** p213
Generic circuit response interpolation for robust design **CDS** p131
Grobner basis view of Welch-Berlekamp algorithm for Reed-Solomon codes **COM** p349
Group-harmonic identification in power systems with nonstationary waveforms **GTD** p517
Hybrid mode analysis of parallel coupled inset dielectric guides **MAP** p57
Identification of coherent generators by spectrum analysis **GTD** p367
Impedance boundary conditions for anisotropic bodies **MAP** p89
Improved frequency domain analysis of microstrip circuits by the method of moments **MAP** p421
Improving efficiencies of superdirective arrays of monopoles over lossy groundplanes by using superconducting disc overlays **MAP** p462
Input impedance of spherical microstrip antenna **MAP** p285
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p445
Load-independent behavioural model for CMOS operational amplifiers **CDS** p399
Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136
Method for analysing the commutation in small universal motors **EPA** p123
Method for array calibration in high-resolution sensor array processing **RSN** p90
Minimax design of two-dimensional parallelogram filter banks **VIS** p220
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Model integration within a manufacturing simulation framework **CTA** p216
Modelling and analysis of electrically conducting vessels and pipelines in electrical resistance process tomography **SMT** p313
Modelling and numerical solution of multibranched DC rail traction power systems **EPA** p323
Modelling studies of microstrip reflectarrays **MAP** p78
Modified stochastic gradient algorithm using nonquadratic cost functions for data echo cancellation **VIS** p187
Moment method analysis of a horizontally polarised omnidirectional slot array antenna **MAP** p1
Multidimensional Laplace transforms for solution of nonlinear equations **SMT** p267
Multifrequency Routh approximants for linear systems **CTA** p351
Multimode equivalent network representation of inductive and capacitive multiple posts **MAP** p41
Multiple scattering by parallel conducting elliptic cylinders: TE case **MAP** p178
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Multivariable system simplification using moment matching and optimisation **CTA** p103
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Neural network load-flow **GTD** p51
New closed-form expression for coupling matrix elements related to scattering from planar periodic single-strip grating **MAP** p492
New line-based thinning algorithm **VIS** p351
New separable transform **VIS** p27
Novel detection of conics using 2-D Hough planes **VIS** p262
Numerical study of a cylindrical dielectric-resonator antenna coated with a dielectric layer **MAP** p189
On the surface impedance used to model the conductor losses of microstrip structures **MAP** p35
One-dimensional processor arrays for linear algebraic problems **CDT** p1
Optimal-power-flow solution by Newton's method applied to an augmented Lagrangian function **GTD** p33
Optimal pricing of transmission services: application to large power systems **GTD** p263
Optimal sampling interval for system identification based on decimation and interpolation **CTA** p15
Optimisation approach to the time-domain electromagnetic inverse problem for a bi-isotropic slab **MAP** p429
Order reduction technique using the Chebyshev polynomial and its application in digital filter design **CDS** p27
Parallel multigrid algorithms on CM-5 **CDT** p177
Parallelising grey-scale coordinate transforms **VIS** p207
Partially adaptive array design using DOA estimation and null steering **RSN** p1
Partially asynchronous co-state prediction algorithm **CTA** p88
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Performance and analysis of an aluminium nitride isolation resistor **MAP** p282
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Performance of the LSBRM using efficient weighting functions for planar structures **MAP** p364
Performance prediction of third-order series resonant convertor **EPA** p29
Power handling capability of a HTS stripline structure using an efficient interior-exterior Green's function method **MAP** p472
Pulse arrival time estimation based on pulse sample ratios **RSN** p153
Radiation by cavity-backed antennas on a circular cylinder **MAP** p233
Radiation characteristic of slots on conducting circular cylinder covered by eccentric dielectric cylinder **MAP** p168
Real time identification of robot dynamic parameters using parallel processing. 1. Theory **CTA** p359
Resonance properties of cylindrical rectangular patch with composite ground plane **MAP** p307
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Scattering characteristics of rectangular coaxial line discontinuities **MAP** p257
Scattering from a wedge with cavity backed apertures in its faces and related configurations: TE case **MAP** p183
Scattering matrix approach for frequency and time domain crosstalk analysis in multilayer PCBs **SMT** p206
Simplified analysis of coated wire antennas and scatterers **MAP** p14
Simulation of transients on transmission lines with corona via the method of characteristics **GTD** p81
Skew-circular/circular correlation decomposition of prime-factor DCT **VIS** p241
Stable and fast neurocontroller for robot arm movement **CTA** p378
Steady state model of the AC/DC convertor in the harmonic domain **GTD** p109
Study of a bias-free least squares parameter estimator **CTA** p1
Study of electromagnetically coupled stacked rectangular patch antennas **MAP** p7
Super-resolution range-Doppler imaging **RSN** p25
Synthesis and RC-active simulation of an LR terminated LC filter **CDS** p49
System identification using partitioned least squares **CTA** p223
System performance implications of homodyne beat noise effects in optical fibre networks **OPT** p143
T-Ω method using hierarchal edge elements **SMT** p133
Thresholding based on histogram approximation **VIS** p271
Time-stepping finite element analysis for a synchronous generator feeding a rectifier load **EPA** p50
Transformer for multimegahertz power applications **EPA** p379
Transient currents on lightning protection systems due to the indirect lightning effect **SMT** p213
Two-stage decomposition of the DCT **VIS** p319
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345
Unified relaxation-pseudocircuit approach for analogue-digital fault diagnosis **CDS** p236
Unusual-length number-theoretic transforms using recursive extensions of Rader's algorithm **VIS** p31
Vector complex eigenmode analysis of microwave cavities **MAP** p457
Verification of spatial domain integral-equation analysis of microstrip wire-grid arrays **MAP** p314
Waveform relaxation analysis of lossy coupled transmission line sets in cascade **CDS** p373

OPTICAL BEAM MODULATORS

Backscatter-induced noise and crosstalk in a FDM multidimensional gyro system using two bias modulators in each gyro loop **OPT** p253
Comparative analysis of the performance limits of Franz-Keldysh effect and quantum-confined Stark effect electroabsorption waveguide modulators **OPT** p109
Effect of roughness and inhomogeneity on evanescent single-mode optical couplers **OPT** p288
Limitations in acousto-optic FM demodulators **OPT** p149
Modal analysis of PbSe-clad optical waveguides **OPT** p183
Proposal for high extinction ratio $LiNbO_3$ optical waveguide cutoff modulator **OPT** p248

OPTICAL COMMUNICATION

Analytical theory of coupled-waveguide Bragg reflectors and resonant transmission filters **OPT** p209
Determination of refractive indices and thicknesses of silica double layer slab waveguides on silicon **OPT** p241
Performance and optimal presynchronisation filtering for direct-detection optical fibre PPM **OPT** p259
Rigorous approach to performance modelling of nonlinear, optically amplified IM/DD systems **OPT** p271
Targeting in nonlinear dynamics of laser diodes **OPT** p157

OPTICAL IMAGE PROCESSING

An approach to partial-discharge investigation by height-distribution analysis **SMT** p102
Associative memory architecture for video compression **CDT** p55
Automatic map reading for distribution system design **GTD** p549
Building irregular pyramids by dual-graph contraction **VIS** p366
Coding gain and spatial localisation properties of discrete wavelet transform filters for image coding **VIS** p133
Construction of 2^n prime-sequence codes for optical code division multiple access **COM** p141
Curve segmentation and representation by superellipses **VIS** p280
Design and VLSI implementation of a new ASIC for colour measurement **CDS** p153
Detection of curved edges at subpixel accuracy using deformable models **VIS** p304
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Development of simple orthogonal transforms for image compression **VIS** p22
Discharge pattern recognition in high voltage equipment **SMT** p51
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Efficient representation of object shape for silhouette intersection **VIS** p359
Fourier descriptor based technique for reconstructing 3D contours from stereo images **VIS** p95
Fractional central moment method for movement-invariant object classification **VIS** p213
Hierarchical line extraction **VIS** p7
Image registration in interferometric SAR processing **RSN** p313
Image segmentation for compression of images and image sequences **VIS** p15
Improved approach to boundary location in two-dimensional echocardiographic images **VIS** p121
Low bit-rate video coding using wavelet vector quantisation **VIS** p141
Measurement of scene-dependent quality variations in digitally coded television pictures **VIS** p149
Minimum spatial entropy threshold selection **VIS** p128
Mode filtering to reduce ultrasound speckle for feature extraction **VIS** p87
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
New line-based thinning algorithm **VIS** p351
New separable transform **VIS** p27
New strategy to locate buried objects in highly lossy ground **RSN** p306
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Novel detection of conics using 2-D Hough planes **VIS** p262
Parallelising grey-scale coordinate transforms **VIS** p207
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Peano scanning based classified vector quantiser **VIS** p111
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Proposed UPC meeting both packet video and network goals **COM** p227
Radar tomography for the generation of three-dimensional images **RSN** p54
Real-time image processing approach to measure traffic queue parameters **VIS** p297
Separable 2-D filters for the detection of ramp edges **VIS** p228
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Signal self-restoration characteristic and bit error rate performance of terrestrial cascaded erbium doped fibre amplifier systems **OPT** p94

SOUT optical intersatellite communication terminal elegant breadboard **OPT** p279
Stereo calibration from correspondences of OTV projections **VIS** p289
Super-resolution range-Doppler imaging **RSN** p25
Texture classification using a spatial-point process model **VIS** p1
Thresholding based on histogram approximation **VIS** p271
Two-dimensional median filter algorithm for parallel reconfigurable computers **VIS** p345
Two-stage decomposition of the DCT **VIS** p319
Very low-bit-rate segmentation-based video coding using contour and texture prediction **VIS** p253
Why illuminant direction is fundamental to texture analysis **VIS** p199

OPTICAL LINKS AND EQUIPMENT

8 Gbit/s GaAs-on-InP 1.3 μm wavelength OEIC transmitter **OPT** p13
Architectures for synchronous optical TDM switching employing semiconductor laser amplifiers **OPT** p132
Asymmetric power coupling in grating-assisted couplers **OPT** p103
Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Construction of 2^n prime-sequence codes for optical code division multiple access **COM** p141
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
New functional multiaddress channel selective terminal using an arrayed waveguide grating multiplexer with cross-connect loopback paths **OPT** p219
Novel laser intersatellite communication system employing optically preamplified PPM receivers **COM** p15
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimisation of wavelength spacing in a WDM transmission system in the presence of fibre nonlinearities **OPT** p190
Signal self-restoration characteristic and bit error rate performance of terrestrial cascaded erbium doped fibre amplifier systems **OPT** p94
Some new families of optical orthogonal codes for code-division multiple-access fibre-optic networks **COM** p363
SOUT optical intersatellite communication terminal elegant breadboard **OPT** p279
System performance implications of homodyne beat noise effects in optical fibre networks **OPT** p143

OPTICAL MATERIALS AND DEVICES

2D optical fully bipolar neural network using colour encoding **OPT** p121
Analysis of couplers composed of a fibre half-block with a slab overlay: effects of curvature of the fibre and asymmetry of the slab waveguide **OPT** p176
Analysis of optical directional couplers composed of asymmetrically curved waveguides **OPT** p305
Analytical theory of coupled-waveguide Bragg reflectors and resonant transmission filters **OPT** p209
Asymmetric power coupling in grating-assisted couplers **OPT** p103
Comparative analysis of the performance limits of Franz-Keldysh effect and quantum-confined Stark effect electroabsorption waveguide modulators **OPT** p109
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Determination of refractive indices and thicknesses of silica double layer slab waveguides on silicon **OPT** p241
Digital optical microphone and digital transducer **CDS** p135
Discussion of the relaxation oscillation frequency in Ga(Al)As quantum well laser structures **OPT** p232
Effect of roughness and inhomogeneity on evanescent single-mode optical couplers **OPT** p288
Exact and variational Fourier transform methods for analysis of multilayered planar waveguides **OPT** p66
Generalised analysis of double-coupler doubly-resonant optical circuit **OPT** p296
In line fibre optic electric field sensing technique without interruption of the fibre **SMT** p109
Limitations in acousto-optic FM demodulators **OPT** p149
Modal analysis of PbSe-clad optical waveguides **OPT** p183
Mode behaviour on bent planar dielectric waveguides **OPT** p115
New complex-coupled DFB-laser with a contacted surface grating for λ=1.55 μm **OPT** p162
New functional multiaddress channel selective terminal using an arrayed waveguide grating multiplexer with cross-connect loopback paths **OPT** p219
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimum carrier lifetime of semiconductor substrate in optoelectronic microwave grating structures **OPT** p197
Proposal for high extinction ratio $LiNbO_3$ optical waveguide cutoff modulator **OPT** p248
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Systematic method for the analysis of optical fibre circuits **OPT** p165
TE waves in circular nonlinear optical antiwaveguide **OPT** p293
Ultrasmall waveguide bends: the corner mirrors of the future? **OPT** p61
VCSEL diffraction-loss theory **OPT** p77

OPTICAL RADAR

Fusion technique for multisensor track initiation **RSN** p225
SOUT optical intersatellite communication terminal elegant breadboard **OPT** p279

OPTIMAL CONTROL

Anticipatory fuzzy control of power systems **GTD** p211
Artificial neural network-based method for transient response prediction **GTD** p323
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Combined active reactive despatch. Part 2: test results **GTD** p401
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Guaranteed cost LQG control of uncertain linear systems **CTA** p95
H_∞ optimisation-based power system stabiliser design **GTD** p179
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Identification and dynamic weights for LQG control with integral action **CTA** p647
Linear switching controller convergence **CTA** p329
Mixed objective constrained stable generalised predictive control **CTA** p286
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Near-optimal productivity control of a continuous bioreactor **CTA** p633
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Optimal path planning for a trolley crane: fast and smooth transfer of load **CTA** p51
Partially asynchronous co-state prediction algorithm **CTA** p88
Performance enhancement of limited-bandwidth active automotive suspensions by road preview **CTA** p140
Polynomial solution of the standard H_∞ control problem for strip mill gauge control **CTA** p515
Robust control of series parallel resonant converters **CTA** p401
Robustness bounds for continuous systems with LQ regulators **CTA** p272
Stability of time-delay singularly perturbed systems **CTA** p111
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Two-degree-of-freedom linear quadratic Gaussian predictive control **CTA** p295

OPTIMISATION

Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Constrained optimisation procedure for evaluating cyclic loading of power transformers **GTD** p240
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Corrective action planning to achieve a feasible optimal power flow solution **GTD** p576
Design of FIR filters with extra constraints using modified LMS algorithm **VIS** p237
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Generalised scheme for optimal learning in recurrent neural networks **VIS** p71
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes **CDT** p215
Hydro-dominated short-term hydrothermal scheduling via a hybrid simulation-optimisation approach: a case study **GTD** p569
Low-frequency suppression of baseband coded sequences **COM** p49
Multivariable system simplification using moment matching and optimisation **CTA** p103
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
Network-growth approach to design of feedforward neural networks **CTA** p486
New strategy to locate buried objects in highly lossy ground **RSN** p306
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimal battery energy storage system (BESS) charge scheduling with dynamic programming **SMT** p453
Optimal sampling interval for system identification based on decimation and interpolation **CTA** p15
Optimisation approach to the time-domain electromagnetic inverse problem for a bi-isotropic slab **MAP** p429
Optimising the time to solution in electrical impedance tomography **SMT** p433
Optimum carrier lifetime of semiconductor substrate in optoelectronic microwave grating structures **OPT** p197
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Reconfiguration of radial distribution networks: application of heuristic methods on large-scale networks **GTD** p631
Scheduling and optimisation for heating of steel soaking pits: case study for hybrid systems **SMT** p362
Security-constrained multiobjective generation dispatch using bicriterion global optimisation **GTD** p406
Two-dimensional median filter algorithm for parallel reconfigurable computers **VIS** p345

PARALLEL PROCESSING

A star-based I/O-bounded network for massively parallel systems **CDT** p5
Adaptive wormhole routing in tori with faults **CDT** p386
C-RISE algorithm for eigendecomposition of Hermitian pencils **RSN** p97
CHiRPS: a general-area parallel multilayer routing system **CDT** p208
Cost-performance analysis of cascaded crossbar interconnected multiprocessors **CDT** p117
Deadlock-free wormhole routing algorithms for star graph topology **CDT** p395
Design and VLSI implementation of a new ASIC for colour measurement **CDS** p153
Efficient CORDIC-based systolic architectures for the discrete Hartley transform **CDT** p201
Efficient heuristic partitioning algorithm for parallel processing of large power systems network equations **GTD** p625
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87
Efficient technique for partitioning and programming linear algebra algorithms on concurrent VLSI architectures **CDS** p97
Fast algorithms for LUC digital signature computation **CDT** p165
Fast pipelined CORDIC-based adaptive lattice predictor: algorithms and architecture **VIS** p339
Fine grain scheduler for shared-memory multiprocessor systems **CDT** p98
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor **CDT** p81
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
Intelligent code migration technique for synchronisation operations on a multiprocessor **CDT** p107
Methodical use of cryptographic transformations in authentication protocols **CDT** p272
Multiple-inputs systolic priority queue for fast sequential decoding of convolutional codes **CDS** p282
One-dimensional processor arrays for linear algebraic problems **CDT** p1
Optimising individual control rules and multiple communicating rule-based control systems with parallel distributed genetic algorithms **CTA** p211
Parallel-decomposition algorithm for discrete computational problems and its application in developing an efficient discrete convolution algorithm **VIS** p40
Parallel multigrid algorithms on CM-5 **CDT** p177
Performance of a neural binary pattern classifier **CDT** p152
Programmable high-performance IIR filter chip **CDS** p179
Routing and performance of the double tree (DOT) network **CDT** p93
Systolic implementation of fixed-point state-space digital filter **CDS** p193
Team algorithms in distributed load flow computations **GTD** p583

Two-dimensional median filter algorithm for parallel reconfigurable computers **VIS** p345
Two parallel paths in incomplete hypercubes **CDT** p353
Unit commitment by parallel simulated annealing **GTD** p595
Using a resource-limited instruction scheduler to evaluate the iHARP processor **CDT** p23
VLSI design of clustering analyser using systolic arrays **CDT** p185

PARAMETER ESTIMATION

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
'Almost blind' signal estimation using second-order moments **RSN** p213
Approximating multirate estimation **VIS** p232
AR modelling of skewed signals using third-order cumulants **VIS** p78
Design and application of extended observers for joint state and parameter estimation in high-performance AC drives **EPA** p71
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Energy saving by coherent sequential detection of radar signals with unknown Doppler shift **RSN** p145
Estimation of complex Fourier coefficients **CTA** p253
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Group-harmonic identification in power systems with nonstationary waveforms **GTD** p517
Linear adaptive decorrelator for signal separation **VIS** p327
Modified forward-backward overdetermined Prony method and its application in modelling heart sounds **VIS** p375
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Parameter estimation of state space models by recurrent neural networks **CTA** p114
Real time identification of robot dynamic parameters using parallel processing. 1. Theory **CTA** p359
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181
Study of a bias-free least squares parameter estimator **CTA** p1
System identification using partitioned least squares **CTA** p223
Tracking constrained adaptive power system stabiliser **GTD** p149
Two-dimensional minimum free energy spectral estimation **VIS** p169
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Very low-bit-rate segmentation-based video coding using contour and texture prediction **VIS** p253

PATTERN RECOGNITION

Building irregular pyramids by dual-graph contraction **VIS** p366
Coding gain and spatial localisation properties of discrete wavelet transform filters for image coding **VIS** p133
Curve segmentation and representation by superellipses **VIS** p280
Detection of curved edges at subpixel accuracy using deformable models **VIS** p304
Development of simple orthogonal transforms for image compression **VIS** p22
Discharge pattern recognition in high voltage equipment **SMT** p51
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Efficient representation of object shape for silhouette intersection **VIS** p359
Fourier descriptor based technique for reconstructing 3D contours from stereo images **VIS** p95
Fractional central moment method for movement-invariant object classification **VIS** p213
Hierarchical line extraction **VIS** p7
Image segmentation for compression of images and image sequences **VIS** p15
Isolated Mandarin syllable recognition using segmental features **VIS** p59
Minimum spatial entropy threshold selection **VIS** p128
Mode filtering to reduce ultrasound speckle for feature extraction **VIS** p87
Model reduction via parameter matching using a Gramian technique **CTA** p186
Multivariable cluster analysis for high-speed industrial machinery **SMT** p417
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
New line-based thinning algorithm **VIS** p351
New separable transform **VIS** p27
Novel detection of conics using 2-D Hough planes **VIS** p262
Orientation assignment of standard cells using a fuzzy mathematical transformation **CDT** p157
Parallelising grey-scale coordinate transforms **VIS** p207
Peano scanning based classified vector quantiser **VIS** p111
Peano scanning based fast encoding algorithm for vector quantisation **VIS** p193
Performance of a neural binary pattern classifier **CDT** p152
Separable 2-D filters for the detection of ramp edges **VIS** p228
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Skew-circular/circular correlation decomposition of prime-factor DCT **VIS** p241
Speaker recognition using hidden Markov models, dynamic time warping and vector quantisation **VIS** p313
Stereo calibration from correspondences of OTV projections **VIS** p289
Super-resolution range-Doppler imaging **RSN** p25
Thresholding based on histogram approximation **VIS** p271
Two-stage decomposition of the DCT **VIS** p319
Very low-bit-rate segmentation-based video coding using contour and texture prediction **VIS** p253
Why illuminant direction is fundamental to texture analysis **VIS** p199

PERFORMANCE EVALUATION

Adaptive wormhole routing in tori with faults **CDT** p386
Concurrent error detection in array multipliers by BIDO **CDT** p425
Cost-performance analysis of cascaded crossbar interconnected multiprocessors **CDT** p117
Reliability of semiconductor RAMs with soft-error scrubbing techniques **CDT** p337
Two parallel paths in incomplete hypercubes **CDT** p353
Using a resource-limited instruction scheduler to evaluate the iHARP processor **CDT** p23

POWER ELECTRONICS

Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis of conduction losses in inverters **EPA** p225
Application of a CMOS current mode approach to on-chip current sensing in smart power circuits **CDS** p357
Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Computer application in the analysis of rectifiers and inverters **EPA** p233
Design and analysis of H-soft-switched converters **EPA** p255
Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Experimental investigation of an advanced static VAr compensator **GTD** p202
Fixed-frequency buck-boost zero-voltage-switched quasiresonant converter **EPA** p289
Losses in PWM inverters using IGBTs **EPA** p285
Minimisation of circuit complexity of step-up/down three-phase AC to DC converter with sinusoidal input current and unity power factor **EPA** p63
Nonlinear capacitive snubbers for improved zero-voltage switching with reduced electromagnetic interference and minimum voltage stresses **EPA** p329
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Parallel resonant converter as a circuit simulation primitive **CDS** p379
Performance prediction of third-order series resonant convertor **EPA** p29
Robust control of series parallel resonant converters **CTA** p401
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Single-phase switch-mode rectifier employing voltage-reversal circuit switched with a fixed frequency **EPA** p154
Soft-switching single-phase–three-phase converters with near unity power factor **EPA** p23
State-plane approach for the analysis of half-bridge parallel resonant converters **CDS** p200
Steady state model of the AC/DC convertor in the harmonic domain **GTD** p109
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Three-phase four wire voltage controlled AC line conditioner with unity input power factor and minimised output voltage harmonics **EPA** p43

POWER ENGINEERING COMPUTING

Application of radial basis function neural network model for short-term load forecasting **GTD** p45
Artificial intelligence-based machine-learning system for thermal generator scheduling **GTD** p195
Artificial neural network-based method for transient response prediction **GTD** p323
Automatic map reading for distribution system design **GTD** p549
Calculating the current distribution in power transformer windings using finite element analysis with circuit constraints **SMT** p231
Combined active reactive despatch. Part 2: test results **GTD** p401
Composite system spinning reserve assessment in interconnected systems **GTD** p305
Computer-aided transducer calibration system for a practical power system **SMT** p459
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Computer application in the analysis of rectifiers and inverters **EPA** p233
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Design of a semiconductor thermoelectric generator for remote subsea wellheads **EPA** p65
Digital simulation of fault location on EHV lines using wideband spread spectrum techniques **GTD** p73
Direct-phase modelling of isolated brushless exciter-alternator unit including the magnetic nonlinearities **EPA** p206
Discharge pattern recognition in high voltage equipment **SMT** p51
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
Dynamically corrected fast estimators of current and voltage magnitude **GTD** p310
Efficient heuristic partitioning algorithm for parallel processing of large power systems network equations **GTD** p625
Efficient methods for identifying weak nodes in electrical power networks **GTD** p317
Eigenvalue approach clustering algorithm for building equivalent models of distribution systems **GTD** p282
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Frequency-independent circuit model of earth return effects in transmission systems **GTD** p143
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy neural networks for time-series forecasting of electric load **GTD** p535
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Identification of synchronous generator saturation models based on on-line digital measurements **GTD** p225
Incorporating nonlinearities of measurement function in power system dynamic state estimation **GTD** p289
Maximum photovoltaic power tracking: an algorithm for rapidly changing atmospheric conditions **GTD** p59
Modelling and control of thyristor-controlled series compensators **GTD** p297
Modelling and stability analysis of a permanent-magnet synchronous machine taking into account the effect of cage bars **EPA** p137
Network modelling of traction substation transformers for studying unbalance effects **GTD** p103
Neural network-based algorithm for power transformer differential relays **GTD** p386
Neural network load-flow **GTD** p51
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
New dynamic filter based on least absolute value algorithm for on-line tracking of power system harmonics **GTD** p37
New technique for the accurate location of earth faults on transmission systems **GTD** p119
Novel approach to alternator field winding interturn fault detection **GTD** p97
Object-oriented design of trouble call analysis system on personal computer **GTD** p167
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185

Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Phase-shifting transformer with fixed phase between terminal voltage and voltage boost: tool for transient stability margin enhancement **GTD** p257
Power-demand forecasting using a neural network with an adaptive learning algorithm **GTD** p560
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Reactive reserve management **GTD** p17
Reconfiguration of radial distribution networks: application of heuristic methods on large-scale networks **GTD** p631
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Rule-based variable-gain power system stabiliser **GTD** p29
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Team algorithms in distributed load flow computations **GTD** p583
Transient analysis of three phase reluctance motors fed from a single phase supply **EPA** p104
Transient currents on lightning protection systems due to the indirect lightning effect **SMT** p213
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345
Unit commitment by parallel simulated annealing **GTD** p595

POWER SYSTEM CONTROL

Anticipatory fuzzy control of power systems **GTD** p211
Artificial intelligence-based machine-learning system for thermal generator scheduling **GTD** p195
Artificial neural network-based method for transient response prediction **GTD** p323
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Combined active reactive despatch. Part 2: test results **GTD** p401
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Frequency domain technique for designing stabilisers for a power plant with identical generators **GTD** p330
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic power system stabiliser **GTD** p277
Fuzzy model based fault diagnosis **CTA** p545
Fuzzy-set approach to dynamic voltage security assessment **GTD** p190
H_∞ optimisation-based power system stabiliser design **GTD** p179
High-frequency current transducers in a control system for quasiresonant power convertors **SMT** p223
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Identifying linear models of systems suffering nonlinear distortions, with a gas turbine application **CTA** p229
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Line conditioning system with simple control strategy and fast dynamic response **GTD** p128
LKF based robust control of electrical servodrives **EPA** p161
Modelling and control of thyristor-controlled series compensators **GTD** p297
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Neural network-based algorithm for power transformer differential relays **GTD** p386
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Neural network modelling of a 200 MW boiler system **CTA** p529
New transducerless magnetic suspension system **SMT** p255
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185
Oscillatory interaction between synchronous generator and local voltage-dependent load **GTD** p473
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Position control of a brushless DC motor without velocity measurements **EPA** p113
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
PWM control method for a four-level inverter **EPA** p390
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reactive reserve management **GTD** p17
Robust control of series parallel resonant converters **CTA** p401
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Rule-based variable-gain power system stabiliser **GTD** p29
Simple algorithm for closed-loop control of stepping motors **EPA** p5
Simplified control strategy to improve AC-input-current waveform of parallel-connected current-type PWM rectifiers **EPA** p246
Switched sliding-mode control for ZCS series-resonant AC/DC converter **EPA** p297
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Three-phase four wire voltage controlled AC line conditioner with unity input power factor and minimised output voltage harmonics **EPA** p43
Three-phase multifunctional battery energy storage system **EPA** p275
Tracking constrained adaptive power system stabiliser **GTD** p149
Transformerless four-wire PWM rectifier and its application in AC-DC-AC converters **EPA** p410
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

POWER SYSTEM MANAGEMENT

Advances in global optimisation for generation expansion planning **GTD** p423
Anticipatory fuzzy control of power systems **GTD** p211
Artificial neural network-based method for transient response prediction **GTD** p323
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Combined active and reactive despatch. I. Problem formulation and solution algorithm **GTD** p393
Combined active reactive despatch. Part 2: test results **GTD** p401
Composite system spinning reserve assessment in interconnected systems **GTD** p305
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Corrective action planning to achieve a feasible optimal power flow solution **GTD** p576
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Direct method for voltage distortion compensation in power networks by series converter filter **EPA** p308
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Economic evaluation of reliability-centred maintenance (RCM): an electricity transmission industry perspective **GTD** p9
Experimental investigation of an advanced static VAr compensator **GTD** p202
Frequency domain technique for designing stabilisers for a power plant with identical generators **GTD** p330
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic power system stabiliser **GTD** p277
Fuzzy-set approach to dynamic voltage security assessment **GTD** p190
H_∞ optimisation-based power system stabiliser design **GTD** p179
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Hydro-dominated short-term hydrothermal scheduling via a hybrid simulation-optimisation approach: a case study **GTD** p569
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Line conditioning system with simple control strategy and fast dynamic response **GTD** p128
Modelling and control of thyristor-controlled series compensators **GTD** p297
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Naturally commutated thyristor-controlled high-pulse VAr compensator **GTD** p219
Neural network-based algorithm for power transformer differential relays **GTD** p386
Neural network load-flow **GTD** p51
Object-oriented design of trouble call analysis system on personal computer **GTD** p167
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185
Optimal pricing of transmission services: application to large power systems **GTD** p263
Performance comparison of the three-phase active-power-filter algorithms **GTD** p646
Private investment in power and deviations from the least cost expansion plan **GTD** p269
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reactive reserve management **GTD** p17
Response of large industrial customers to electricity pricing by voluntary time-of-use in Taiwan **GTD** p157
Rule-based variable-gain power system stabiliser **GTD** p29
Security-constrained multiobjective generation dispatch using bicriterion global optimisation **GTD** p406
Security evaluation of composite power systems **GTD** p511
Technical and economic feasibility of conversion to a higher voltage distribution **GTD** p468
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Three-phase multifunctional battery energy storage system **EPA** p275
Tracking constrained adaptive power system stabiliser **GTD** p149
Unit commitment by parallel simulated annealing **GTD** p595

POWER SYSTEM PROTECTION

Current limiting properties of an expanding helical arc **SMT** p201
Digital simulation of fault location on EHV lines using wideband spread spectrum techniques **GTD** p73
Direct voltage and trapped charge effects on the protective characteristic of ZnO surge arresters **SMT** p442
Dynamically corrected fast estimators of current and voltage magnitude **GTD** p310
Earth fault currents and potentials distribution in composite systems **GTD** p135
Efficient computation of rodbed grounding resistance in a homogeneous earth by Galerkin's moment method **GTD** p653
Neural network-based algorithm for power transformer differential relays **GTD** p386
Security evaluation of composite power systems **GTD** p511
Stochastic modelling of high-speed reclosing in probabilistic transient stability studies **GTD** p350
Transient currents on lightning protection systems due to the indirect lightning effect **SMT** p213

POWER SYSTEMS AND APPLICATIONS

Analysis and simulation of the high-speed torque performance of brushless DC motor drives **EPA** p191
Design and application of extended observers for joint state and parameter estimation in high-performance AC drives **EPA** p71

Design of a semiconductor thermoelectric generator for remote subsea wellheads **EPA** p65
Development of a model for representing dynamic behaviour of synchronous motor variable speed drives **EPA** p269
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Impact on the power system of single-phase input cycloconvertor motor drives **EPA** p176
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p445
LKF based robust control of electrical servodrives **EPA** p161
Modelling and numerical solution of multibranched DC rail traction power systems **EPA** p323
Network modelling of traction substation transformers for studying unbalance effects **GTD** p103
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
PWM technique utilisation in the quasiresonant convertor **EPA** p145
Response of large industrial customers to electricity pricing by voluntary time-of-use in Taiwan **GTD** p157
Robust speed control of brushless direct-drive motor usiing integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

POWER SYSTEMS AND PLANTS

Active reactive-power controller **EPA** p405
Advances in global optimisation for generation expansion planning **GTD** p423
Algorithm for determining phase-angle observability in the presence of line-current-magnitude measurements **GTD** p453
An investigation into breaker reclosure strategy for adaptive single pole autoreclosing **GTD** p601
Analysis and simulation of the high-speed torque performance of brushless DC motor drives **EPA** p191
Application of radial basis function neural network model for short-term load forecasting **GTD** p45
Application of synchronised phasor measurements to real-time transient stability prediction **GTD** p355
Artificial intelligence-based machine-learning system for thermal generator scheduling **GTD** p195
Automatic map reading for distribution system design **GTD** p549
Broadband couplers for UHF detection of partial discharge in gas-insulated substations **SMT** p237
Computer-aided transducer calibration system for a practical power system **SMT** p459
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Design and application of extended observers for joint state and parameter estimation in high-performance AC drives **EPA** p71
Detection of Jacobian singularity and network islanding in power flow computations **GTD** p589
Development of a model for representing dynamic behaviour of synchronous motor variable speed drives **EPA** p269
Digital simulation of fault location on EHV lines using wideband spread spectrum techniques **GTD** p73
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
DSP based integral variable structure control for DC motor servo drivers **CTA** p444
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Dynamically corrected fast estimators of current and voltage magnitude **GTD** p310
Earth fault currents and potentials distribution in composite systems **GTD** p135
Efficient heuristic partitioning algorithm for parallel processing of large power systems network equations **GTD** p625
Efficient methods for identifying weak nodes in electrical power networks **GTD** p317
Eigenvalue approach clustering algorithm for building equivalent models of distribution systems **GTD** p282
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Evaluation of line loss under load unbalance using the complex unbalance factor **GTD** p173
Experimental investigation of an advanced static VAr compensator **GTD** p202
Experimental validation of a numerical model of busbar systems **GTD** p65
Frequency-independent circuit model of earth return effects in transmission systems **GTD** p143
Fuzzy neural networks for time-series forecasting of electric load **GTD** p535
Group-harmonic identification in power systems with nonstationary waveforms **GTD** p517
Hybrid expert system and simulated annealing approach to optimal reactive power planning **GTD** p381
Hydro-dominated short-term hydrothermal scheduling via a hybrid simulation-optimisation approach: a case study **GTD** p569
Identification of coherent generators by spectrum analysis **GTD** p367
Impact on the power system of single-phase input cycloconvertor motor drives **EPA** p176
Implicit generator and SVC modelling for contingency scheduling of reactive power dispatch **GTD** p527
Incorporating nonlinearities of measurement function in power system dynamic state estimation **GTD** p289
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p445
LKF based robust control of electrical servodrives **EPA** p161
Magnetic fields from transmission lines: comparison of calculations and measurements **GTD** p481
Maximum photovoltaic power tracking: an algorithm for rapidly changing atmospheric conditions **GTD** p59
Modelled operation of the Shetland Islands power system comparing computational and human operators' load forecasts **GTD** p555
Modelling and control of thyristor-controlled series compensators **GTD** p297
Modelling and numerical solution of multibranched DC rail traction power systems **EPA** p323
Modelling multistate problems in sequential simulation of power system reliability studies **GTD** p343
Network modelling of traction substation transformers for studying unbalance effects **GTD** p103
Neural network approach to signal modelling in power systems **CTA** p257
Neural network modelling of a 200 MW boiler system **CTA** p529
New dynamic filter based on least absolute value algorithm for on-line tracking of power system harmonics **GTD** p37
New technique for the accurate location of earth faults on transmission systems **GTD** p119
New transducerless magnetic suspension system **SMT** p255
Object-oriented design of trouble call analysis system on personal computer **GTD** p167
Optimal battery energy storage system (BESS) charge scheduling with dynamic programming **SMT** p453
Optimal choice of fixed and switched capacitors in radial distributors with distorted substation voltage **GTD** p24
Optimal-power-flow solution by Newton's method applied to an augmented Lagrangian function **GTD** p33
Partial discharge plant-monitoring technology: present and future developments **SMT** p4
Performance of a single-phase to three-phase cycloconvertor drive **EPA** p169
Pertinent factors in the adequacy evaluation of an overall electric power system **GTD** p337
Phase-shifting transformer with fixed phase between terminal voltage and voltage boost: tool for transient stability margin enhancement **GTD** p257
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
Power-demand forecasting using a neural network with an adaptive learning algorithm **GTD** p560
Private investment in power and deviations from the least cost expansion plan **GTD** p269
PWM technique utilisation in the quasiresonant convertor **EPA** p145
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reactive reserve management **GTD** p17
Response of large industrial customers to electricity pricing by voluntary time-of-use in Taiwan **GTD** p157
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Simple wind farm dynamic model **GTD** p545
Stochastic modelling of high-speed reclosing in probabilistic transient stability studies **GTD** p350
Team algorithms in distributed load flow computations **GTD** p583
Thermal generator scheduling using hybrid genetic/simulated-annealing approach **GTD** p372
Three-phase multifunctional battery energy storage system **EPA** p275
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345
Unit commitment by parallel simulated annealing **GTD** p595
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

POWER TRANSMISSION AND DISTRIBUTION

Automatic map reading for distribution system design **GTD** p549
Composite system spinning reserve assessment in interconnected systems **GTD** p305
Distribution system service restoration using the artificial neural network approach and pattern recognition method **GTD** p251
Economic evaluation of reliability-centred maintenance (RCM): an electricity transmission industry perspective **GTD** p9
Efficient heuristic partitioning algorithm for parallel processing of large power systems network equations **GTD** p625
Eigenvalue approach clustering algorithm for building equivalent models of distribution systems **GTD** p282
Evaluation of line loss under load unbalance using the complex unbalance factor **GTD** p173
Frequency-independent circuit model of earth return effects in transmission systems **GTD** p143
HVDC convertor waveform distortion: a frequency-domain analysis **GTD** p88
Loss minimisation using islanding technique for district of Klang, Malaysia **GTD** p523
Modelling and control of thyristor-controlled series compensators **GTD** p297
Modelling and numerical solution of multibranched DC rail traction power systems **EPA** p323
New technique for the accurate location of earth faults on transmission systems **GTD** p119
Optimal choice of fixed and switched capacitors in radial distributors with distorted substation voltage **GTD** p24
Optimal pricing of transmission and distribution services in electricity supply **GTD** p1
Optimal pricing of transmission services: application to large power systems **GTD** p263
Pertinent factors in the adequacy evaluation of an overall electric power system **GTD** p337
Phase-shifting transformer with fixed phase between terminal voltage and voltage boost: tool for transient stability margin enhancement **GTD** p257
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Reconfiguration of radial distribution networks: application of heuristic methods on large-scale networks **GTD** p631
Simple wind farm dynamic model **GTD** p545
Simplified bidirectional-feeder models for distribution-system calculations **GTD** p459
Simulation of transients on transmission lines with corona via the method of characteristics **GTD** p81
Technical and economic feasibility of conversion to a higher voltage distribution **GTD** p468
Unified AC/DC power flow for system simulation in DC electrified transit railways **EPA** p345

PREDICTIVE CONTROL

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Anticipatory fuzzy control of power systems **GTD** p211
Artificial neural network-based method for transient response prediction **GTD** p323
Mixed objective constrained stable generalised predictive control **CTA** p286

Performance enhancement of limited-bandwidth active automotive suspensions by road preview **CTA** p140
Two-degree-of-freedom linear quadratic Gaussian predictive control **CTA** p295

PROBABILITY AND STATISTICS

Adaptive target tracking algorithms for airborne ultrasonic rangefinders **RSN** p81
'Almost blind' signal estimation using second-order moments **RSN** p213
Alternative routing strategies for adjacent cells in mobile radio systems **COM** p115
An approach to partial-discharge investigation by height-distribution analysis **SMT** p102
Analysis of conduction losses in inverters **EPA** p225
Analytical approach to changepoint detection in Laplacian noise **VIS** p174
AR modelling of skewed signals using third-order cumulants **VIS** p78
Bias and variance calculation of a principal component based frequency estimator **VIS** p247
Bit-error probability of QPSK with noisy phase reference **COM** p292
Calculating the K-distribution by saddlepoint integration **RSN** p162
Channel-effect-cancellation method for speech recognition over telephone systems **VIS** p395
Chaotic ferroresonance in power transformers **GTD** p247
Composite system spinning reserve assessment in interconnected systems **GTD** p305
Construction of optimal frequency hopping sequences for minimising bit errors in selective fading channels characteristic to digital cellular systems **COM** p271
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Detection performance of the trimmed-mean CFAR processor with noncoherent integration **RSN** p18
Determining the power rating of a multichannel linear amplifier **COM** p274
Development of simple orthogonal transforms for image compression **VIS** p22
Discharge pattern recognition in high voltage equipment **SMT** p51
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Doppler ambiguity resolution using staggered PRF with a new chirp sweep-rate estimation algorithm **RSN** p191
Dynamic partial search scheme for stochastic codebook of FS1016 CELP coder **VIS** p52
Dynamic polling orders in multiserver multiqueue systems **COM** p75
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Estimating the correlation properties of k-distributed SAR clutter **RSN** p167
Estimating the cost of a telecommunications network using the fractal structure of the human population distribution **COM** p172
Fast approximate maximum likelihood algorithm for single source localisation **RSN** p232
Frequency dependence of backscattered signals from forest components **RSN** p301
Fuzzy neural networks for time-series forecasting of electric load **GTD** p535
General class of non-Gaussian coherent clutter models **RSN** p61
Joint phase and envelope densities of a higher order **RSN** p123
Low-complexity trellis decoding of linear block codes **COM** p201
Maximum entropy and minimum relative entropy in performance evaluation of digital communication systems **COM** p250
Maximum likelihood estimation of signal power in sensor array in the presence of unknown noise field **RSN** p218
Mode filtering to reduce ultrasound speckle for feature extraction **VIS** p87
Modelled operation of the Shetland Islands power system comparing computational and human operators' load forecasts **GTD** p555
Modelling multistate problems in sequential simulation of power system reliability studies **GTD** p343
Multiple call hand-off problem with queued hand-offs and mixed platform types **COM** p31
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Neural-network-based near-time-optimal position control method for DC motor servosystems **CTA** p493
Neural network modelling of a 200 MW boiler system **CTA** p529
New approach for traffic characterisation in ATM networks **COM** p87
Nonstationary behaviour of partial discharge during discharge induced ageing of dielectrics **SMT** p37
Online PCBN tool failure monitoring system based on acoustic emission signatures **SMT** p404
Optimal design of a finite-buffer polling network with mixed service discipline and general service order sequence **COM** p1
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge pulse distribution pattern analysis **SMT** p46
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Pragmatic approach to soft-decision decoding of linear block codes **COM** p40
Predicted performance of a symmetric-pair direction finding system in low signal-to-noise environments **RSN** p199
Reduced-state Viterbi differential detection using a recursively estimated phase reference for M-ary DPSK **COM** p263
Security evaluation of composite power systems **GTD** p511
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181
Speaker recognition using hidden Markov models, dynamic time warping and vector quantisation **VIS** p313
Stochastic modelling of high-speed reclosing in probabilistic transient stability studies **GTD** p350
Stochastic simulation Bayesian approach to multitarget tracking **RSN** p41
System performance implications of homodyne beat noise effects in optical fibre networks **OPT** p143
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106
Texture classification using a spatial-point process model **VIS** p1
Theoretical performance of a multisensor track-to-track correlation technique **RSN** p281
Thresholding based on histogram approximation **VIS** p271
Triple-receiver-based code protocol for unslotted DS/SSMA packet-radio networks and its performance analysis **COM** p193
Use of perturbation methods in the problem of radar detection against a K-clutter background **RSN** p243

PRODUCTION ENGINEERING

Accurate and efficient CAD tool for the design of optimum packaging for (M)MICs **MAP** p81
An approach to partial-discharge investigation by height-distribution analysis **SMT** p102
Business process re-engineering an electronic products supply chain **SMT** p395
Contingent approach to the application of concurrent engineering to the product introduction process **SMT** p389
Design of a virtual LCR component meter **SMT** p114
Design of the new product introduction process to achieve world class benchmarks **SMT** p338
Design support based on projection of information across the product-development life cycle by means of case-based reasoning **SMT** p345
Direct voltage and trapped charge effects on the protective characteristic of ZnO surge arresters **SMT** p442
Economic evaluation of reliability-centred maintenance (RCM): an electricity transmission industry perspective **GTD** p9
Effects of response quantisation on the accuracy of transient response test results **CDS** p334
Embedded ADC characterisation techniques **CDS** p145
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
HyHOPE: fast fault simulator with efficient simulation of hypertrophic faults **CDS** p53
Methods and tools for manufacturing enterprise modelling and model enactment **SMT** p378
Model integration within a manufacturing simulation framework **CTA** p216
Modelling multistate problems in sequential simulation of power system reliability studies **GTD** p343
Multivariable cluster analysis for high-speed industrial machinery **SMT** p417
Near-optimal productivity control of a continuous bioreactor **CTA** p633
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Optimising individual control rules and multiple communicating rule-based control systems with parallel distributed genetic algorithms **CTA** p211
Optimum hop length for millimetre wave radio links in an arid climate **MAP** p156
Partial discharge mechanisms in voids related to dielectric degradation **SMT** p62
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Partial discharge signal generation transmission and acquisition **SMT** p22
Partial discharges in flat, dielectric/metallic bounded cavities **SMT** p490
Pertinent factors in the adequacy evaluation of an overall electric power system **GTD** p337
Polynomial solution of the standard H_∞ control problem for strip mill gauge control **CTA** p515
Pulse-sequence analysis: a new method for investigating the physics of PD-induced ageing **SMT** p95
Reliability of semiconductor RAMs with soft-error scrubbing techniques **CDT** p337
Review of modelling techniques and tools for decision making in manufacturing management **SMT** p371
Security evaluation of composite power systems **GTD** p511
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Statistical process control: examination of use in a small printed circuit board manufacturer **SMT** p463
Structured methodology for the selection and effective implementation of manufacturing control systems **SMT** p411

PROGRAMMING SUPPORT

Dynamic polling orders in multiserver multiqueue systems **COM** p75
Methods and tools for manufacturing enterprise modelling and model enactment **SMT** p378

PROGRAMMING THEORY

Associative memory architecture for video compression **CDT** p55
CHiRPS: a general-area parallel multilayer routing system **CDT** p208
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions **CDT** p249
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87
Efficient state encoding algorithm based on hypercube construction **CDT** p225
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis **CDT** p65
Parallel-decomposition algorithm for discrete computational problems and its application in developing an efficient discrete convolution algorithm **VIS** p40
Parallel multigrid algorithms on CM-5 **CDT** p177
Quotient prediction without prescaling **CDT** p15
Realisation of morphological operations **CDS** p364
VLSI architectures for computing X mod m **CDS** p313

RADAR AND RADIONAVIGATION

Adaptive-update-rate target tracking for phased-array radar **RSN** p137
Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Frequency dependence of backscattered signals from forest components **RSN** p301
High order nonlinearities in HF radar backscatter from the ocean surface **RSN** p293
Image registration in interferometric SAR processing **RSN** p313
New polarimetric calibration technique using a single calibration dihedral **MAP** p19
New strategy to locate buried objects in highly lossy ground **RSN** p306
Radar tomography for the generation of three-dimensional images **RSN** p54
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109

RADAR CLUTTER

Analysis of the censored-mean level CFAR processor in multiple target and nonuniform clutter **RSN** p259
Estimating the correlation properties of k-distributed SAR clutter **RSN** p167
General class of non-Gaussian coherent clutter models **RSN** p61
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Stochastic simulation Bayesian approach to multitarget tracking **RSN** p41
Use of perturbation methods in the problem of radar detection against a K-clutter background **RSN** p243

RADAR THEORY

Adaptive interacting multiple model algorithm for tracking a manoeuvring target **RSN** p11
Adaptive-update-rate target tracking for phased-array radar **RSN** p137
Analysis of the censored-mean level CFAR processor in multiple target and nonuniform clutter **RSN** p259
Backscattering study on non-orthogonal trihedral corner reflectors **MAP** p441
Calculating the K-distribution by saddlepoint integration **RSN** p162
Comparative study of time-frequency and time-scale transforms for ultra-wideband radar transient signal detection **RSN** p236
Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Detection performance of the trimmed-mean CFAR processor with noncoherent integration **RSN** p18
Doppler ambiguity resolution using staggered PRF with a new chirp sweep-rate estimation algorithm **RSN** p191
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Electromagnetic scattering from anisotropically coated impedance cylinder **MAP** p163
Energy saving by coherent sequential detection of radar signals with unknown Doppler shift **RSN** p145
Estimating the correlation properties of k-distributed SAR clutter **RSN** p167
Fusion technique for multisensor track initiation **RSN** p225
General class of non-Gaussian coherent clutter models **RSN** p61
High order nonlinearities in HF radar backscatter from the ocean surface **RSN** p293
Joint phase and envelope densities of a higher order **RSN** p123
New polarimetric calibration technique using a single calibration dihedral **MAP** p19
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Power spectral lineshapes of microwave radiation backscattered from sea surfaces at small grazing angles **RSN** p252
Radar tomography for the generation of three-dimensional images **RSN** p54
Scattering and emission from two-scale randomly rough sea surface with foam scatterers **MAP** p109
Simplified analysis of coated wire antennas and scatterers **MAP** p14
Stochastic simulation Bayesian approach to multitarget tracking **RSN** p41
Super-resolution range-Doppler imaging **RSN** p25
Use of perturbation methods in the problem of radar detection against a K-clutter background **RSN** p243

RADIO DIRECTION-FINDING

Control of the spectra of DS-SS split signals by interleaving **RSN** p206
Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Digital signal processing of Decca Navigator radionavigation signals **RSN** p71
Direction finding system using symmetric-pair antenna arrays **RSN** p130
Effects of multipath and antenna on GPS observables **RSN** p267

RADIO SYSTEMS

A more rigorous UTD-based expression for multiple diffractions by buildings **MAP** p481
Adaptive frequency hopping in HF communications **COM** p99
Adaptive traffic-load shedding and its capacity gain in CDMA cellular systems **COM** p186
Alternative routing strategies for adjacent cells in mobile radio systems **COM** p115
Analysis of a coupled patch antenna with application in personal communications **MAP** p495
Analytical and measured performance of the combined analogue locked loop universal modulator (CALLUM) **COM** p297
Bit-error-rate performance for asynchronous DS-CDMA over multipath fading channels **COM** p307
Channel coding for VSAT systems **COM** p333
Construction of optimal frequency hopping sequences for minimising bit errors in selective fading channels characteristic to digital cellular systems **COM** p271
Demodulation and decoding for diversity mobile radio systems **COM** p315
Detection of spread-spectrum signals using the time-domain filtered cross spectral density **RSN** p286
Determining the power rating of a multichannel linear amplifier **COM** p274
Diversity for noncoherent DPSK direct-sequence CDMA over a shadowed Rician-fading satellite channel **COM** p386
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Effects of multipath and antenna on GPS observables **RSN** p267
Generalised Barker-like PN sequences for quasisynchronous spread-spectrum multiple-access communication systems **COM** p91
ICA-based technique for radiating sources estimation: application to airport surveillance [and reply] **RSN** p211
Laboratory performance of spread spectrum detectors **COM** p243
Microstrip ring antennas operating at higher order modes for mobile communications **MAP** p151
Mobile radio propagation prediction in irregular cellular topographies using ray methods **MAP** p447
Modelling and measurements of channel impulse response for an indoor wireless communication system **MAP** p405
Multiple aperture higher order mode couplers: analysis and design **MAP** p93
Multiple call hand-off problem with queued hand-offs and mixed platform types **COM** p31
Narrowband interference rejection in direct-sequence spread-spectrum system using time-frequency decomposition **COM** p393
Optimum hop length for millimetre wave radio links in an arid climate **MAP** p156
Overlapping coverage and channel rearrangement in microcellular communication systems **COM** p323
Performance-bound analysis of the new DS/SSMA protocol for wireless data networks **COM** p255
Prediction of scintillation effects on satellite communications above 10 GHz **MAP** p102
Reconfigurable reflector antenna producing pattern nulls **MAP** p121
Reduced-state Viterbi differential detection using a recursively estimated phase reference for M-ary DPSK **COM** p263
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Study of path inclination effects on performance of LOS microwave links in southern India **MAP** p295
Subspace approach to channel assignment in mobile communication networks **COM** p179
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106
Triple-receiver-based code protocol for unslotted DS/SSMA packet-radio networks and its performance analysis **COM** p193

RADIOWAVE PROPAGATION

A more rigorous UTD-based expression for multiple diffractions by buildings **MAP** p481
Adaptive frequency hopping in HF communications **COM** p99
Effects of multipath and antenna on GPS observables **RSN** p267
Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136
Mobile radio propagation prediction in irregular cellular topographies using ray methods **MAP** p447
Modelling and measurements of channel impulse response for an indoor wireless communication system **MAP** p405
Multicomponents discrete propagation model of forest **MAP** p201
Optimum hop length for millimetre wave radio links in an arid climate **MAP** p156
Prediction of scintillation effects on satellite communications above 10 GHz **MAP** p102
Signal-to-interference calculations for modern TDMA cellular communication systems **COM** p21
Study of path inclination effects on performance of LOS microwave links in southern India **MAP** p295
Technique for cochannel interference suppression in TDMA mobile radio systems **COM** p106

SELF-ADJUSTING SYSTEMS

Adaptive control of discrete systems using neural networks **CTA** p526
Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Analysis, modelling-and control of an advanced automotive self-levelling suspension system **CTA** p129
BPD computation and model reference adaptive control (MRAC) of Hammerstein plants **CTA** p475
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Developing a neurocompensator for the adaptive control of robots **CTA** p562
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Direct neural model reference adaptive control **CTA** p31
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Model-based compensation and comparison of neural network controllers for uncertainties of robotic arms **CTA** p501
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Position control with fuzzy adaptation for induction servomotor drive **EPA** p397
Stable and fast neurocontroller for robot arm movement **CTA** p378
Tracking constrained adaptive power system stabiliser **GTD** p149
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411
Variable structure based decentralised adaptive control **CTA** p439

SEMICONDUCTOR DEVICE MODELLING

Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis of abrupt and linearly graded heterojunction bipolar transistors with or without a setback layer **CDS** p254
Compact $Si_{1-x}Ge_x/Si$ heterojunction bipolar transistor model for device and circuit simulation **CDS** p1
Determination of the RF-noise source parameters in AlInAs/GaInAs-HEMT heterostructures based on measured noise temperature dependence against electric field **CDS** p339
Effect of carrier lifetimes on forward characteristics of MOS-controlled thyristors **CDS** p205
Large-signal temperature-dependent DC model for heterojunction bipolar transistors **MAP** p417
Novel technology independent neural network approach on device modelling interface **CDS** p74
Single mode power and modal behaviour in buried vertical-cavity surface-emitting lasers **OPT** p87
Study of carrier transport effects on quantum well lasers using a SPICE simulator **OPT** p237
Thermal modelling of vertical-cavity surface-emitting lasers using the finite-element method **OPT** p82
Travelling wave semiconductor laser amplifier detector noise characteristics **OPT** p23

SEMICONDUCTOR DEVICES AND MATERIALS

AC characterisation of the p inverted buried channel heterostructure FET and its suitability for complementary electronics **CDS** p105
Analysis and optimisation of a flyback convertor with a nondissipative snubber **EPA** p35
Analysis of abrupt and linearly graded heterojunction bipolar transistors with or without a setback layer **CDS** p254
Compact $Si_{1-x}Ge_x/Si$ heterojunction bipolar transistor model for device and circuit simulation **CDS** p1
Comparative study on electrical performance of normal and superconducting multiconductor lines for high-speed interconnects and uniplanar MICs **MAP** p71
Determination of the RF-noise source parameters in AlInAs/GaInAs-HEMT heterostructures based on measured noise temperature dependence against electric field **CDS** p339
Effect of carrier lifetimes on forward characteristics of MOS-controlled thyristors **CDS** p205
Investigation of GaAs homojunction bipolar transistor with delta doping emitter structure **CDS** p406
Large-signal temperature-dependent DC model for heterojunction bipolar transistors **MAP** p417
Losses in PWM inverters using IGBTs **EPA** p285

New formulation of the collector current and current gain relations for design purposes of power transistor switches **CDS** p113
Optimisation of high-performance gates in AlGaAs/GaAs quantum-well technology **CDS** p394
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Single-cavity abreast two-device power combiner **MAP** p333
Single-phase switch-mode rectifier employing voltage-reversal circuit switched with a fixed frequency **EPA** p154
Temperature-induced rebound in Al-gate NMOS transistors **CDS** p413

SEMICONDUCTOR LASERS

8 Gbit/s GaAs-on-InP 1.3 μm wavelength OEIC transmitter **OPT** p13
Analysis of corrugated quantum well structures for laser applications **OPT** p2
Architectures for synchronous optical TDM switching employing semiconductor laser amplifiers **OPT** p132
Cavity and reflector design for vertical cavity surface emitting lasers **OPT** p37
Current modulation and transient dynamics of single-mode semiconductor lasers under different feedback conditions **OPT** p17
Discussion of the relaxation oscillation frequency in Ga(Al)As quantum well laser structures **OPT** p232
Effects of lateral modes on the static and dynamic behaviour of buried heterostructure DFB lasers **OPT** p97
New complex-coupled DFB-laser with a contacted surface grating for λ=1.55 μm **OPT** p162
Numerical analysis of transverse mode in gain-guided vertical cavity surface emitting lasers **OPT** p29
Simulation of enhanced plasma effect wavelength tunable lasers **OPT** p55
Simulation of frequency chirps in MQW DFB lasers under external modulation **OPT** p44
Single mode power and modal behaviour in buried vertical-cavity surface-emitting lasers **OPT** p87
Study of carrier transport effects on quantum well lasers using a SPICE simulator **OPT** p237
Targeting in nonlinear dynamics of laser diodes **OPT** p157
Theoretical analysis of the influence of the barrier composition on properties of GaInAs/GaInAsP/GaInP laser diodes **OPT** p5
Thermal modelling of vertical-cavity surface-emitting lasers using the finite-element method **OPT** p82
Travelling wave semiconductor laser amplifier detector noise characteristics **OPT** p23
VCSEL diffraction-loss theory **OPT** p77
Wavelength and polarisation switching in InGaAsP/InP DFB lasers **OPT** p51

SIGNAL DETECTION

Analytical approach to changepoint detection in Laplacian noise **VIS** p174
Joint phase and envelope densities of a higher order **RSN** p123
Laboratory performance of spread spectrum detectors **COM** p243
Pulse arrival time estimation based on pulse sample ratios **RSN** p153
Reduced pull-in time of phase-locked loops using a simple nonlinear phase detector **COM** p221
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181

SIGNAL GENERATORS

Multiphase sinusoidal oscillator using the CFOA pole **CDS** p37
Transformation of sinusoidal oscillators using universal active elements **CDS** p353

SIGNAL PROCESSING

2-D multitarget angle tracking algorithm using sensor array **RSN** p158
Adaptive eigen-subspace algorithms for tracking suddenly disappearing sources **RSN** p277
Adaptive instrumental variable method for robust direction-of-arrival estimation **RSN** p45
Adaptive interacting multiple model algorithm for tracking a manoeuvring target **RSN** p11
Adaptive target tracking algorithms for airborne ultrasonic rangefinders **RSN** p81
Adaptive-update-rate target tracking for phased-array radar **RSN** p137
'Almost blind' signal estimation using second-order moments **RSN** p213
Analysis of the censored-mean level CFAR processor in multiple target and nonuniform clutter **RSN** p259
Analytical approach to changepoint detection in Laplacian noise **VIS** p174
Approximating multirate estimation **VIS** p232
AR modelling of skewed signals using third-order cumulants **VIS** p78
Bias and variance calculation of a principal component based frequency estimator **VIS** p247
C-RISE algorithm for eigendecomposition of Hermitian pencils **RSN** p97
Calculating the K-distribution by saddlepoint integration **RSN** p162
Centralised integration of multisensor noisy and fuzzy data **CTA** p459
Comparative study of time-frequency and time-scale transforms for ultra-wideband radar transient signal detection **RSN** p236
Continuous-time envelope constrained filter design via orthonormal filters **VIS** p389
Design and VLSI implementation of an address generation coprocessor **CDT** p145
Design of FIR filters with extra constraints using modified LMS algorithm **VIS** p237
Detailed inherent bias analysis in ground referenced aircraft height monitoring **RSN** p195
Detection performance of the trimmed-mean CFAR processor with noncoherent integration **RSN** p18
Determining the power rating of a multichannel linear amplifier **COM** p274
Development and application of a 10 MHz digital system for current-zero measurements **SMT** p125
Digital signal processing of Decca Navigator radionavigation signals **RSN** p71
Direct interpolation method for reducing the non-linearity and quantisation distortion of analogue-to-digital convertors **CDS** p61
Direction finding system using symmetric-pair antenna arrays **RSN** p130
Directivity of acoustic signals from partial discharges in oil **SMT** p85
Distortion analysis of nonlinear systems with memory using maximum-length sequences **CDS** p345
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Doppler ambiguity resolution using staggered PRF with a new chirp sweep-rate estimation algorithm **RSN** p191
Energy saving by coherent sequential detection of radar signals with unknown Doppler shift **RSN** p145
Estimating the correlation properties of k-distributed SAR clutter **RSN** p167
Fast approximate maximum likelihood algorithm for single source localisation **RSN** p232
Fast computation of the two-dimensional generalised Hartley transforms **VIS** p35
Fast pipelined CORDIC-based adaptive lattice predictor: algorithms and architecture **VIS** p339
Fixed-point error analysis of radix-4 FHT algorithm with optimised scaling schemes **VIS** p65
Fusion technique for multisensor track initiation **RSN** p225
High order nonlinearities in HF radar backscatter from the ocean surface **RSN** p293
High-throughput data compressor designs using content addressable memory **CDS** p69
Joint phase and envelope densities of a higher order **RSN** p123
Laboratory performance of spread spectrum detectors **COM** p243
Linear adaptive decorrelator for signal separation **VIS** p327
Linearly pulse-width modulated block pulse functions and their application to linear SISO feedback control system identification **CTA** p44
Maximum entropy and minimum relative entropy in performance evaluation of digital communication systems **COM** p250
Maximum likelihood estimation of signal power in sensor array in the presence of unknown noise field **RSN** p218
Measurements of direction of arrival of HF sky wave signals by means of a wide aperture antenna array and two super resolution direction finding algorithms **MAP** p136
Method for array calibration in high-resolution sensor array processing **RSN** p90
Minimax design of two-dimensional parallelogram filter banks **VIS** p220
Modelling of acoustic transfer functions for echo cancellers **VIS** p47
Modified forward-backward overdetermined Prony method and its application in modelling heart sounds **VIS** p375
Modified stochastic gradient algorithm using nonquadratic cost functions for data echo cancellation **VIS** p187
Multiple-inputs systolic priority queue for fast sequential decoding of convolutional codes **CDS** p282
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Narrowband interference rejection in direct-sequence spread-spectrum system using time-frequency decomposition **COM** p393
Neural network approach to signal modelling in power systems **CTA** p257
New transform using the Mersenne numbers **VIS** p381
Online PCBN tool failure monitoring system based on acoustic emission signatures **SMT** p404
Order reduction technique using the Chebyshev polynomial and its application in digital filter design **CDS** p27
Parallel-decomposition algorithm for discrete computational problems and its application in developing an efficient discrete convolution algorithm **VIS** p40
Partial discharge pulse distribution pattern analysis **SMT** p46
Partial discharge signal generation transmission and acquisition **SMT** p22
Partially adaptive array design using DOA estimation and null steering **RSN** p1
Performance and optimal presynchronisation filtering for direct-detection optical fibre PPM **OPT** p259
Performance of adaptive optimal Doppler processors in heterogeneous clutter **RSN** p179
Predicted performance of a symmetric-pair direction finding system in low signal-to-noise environments **RSN** p199
Pulse arrival time estimation based on pulse sample ratios **RSN** p153
Realisation of morphological operations **CDS** p364
Recursive procedures for constrained optimisation problems and its application in signal processing **VIS** p161
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions **CDT** p325
Reduced pull-in time of phase-locked loops using a simple nonlinear phase detector **COM** p221
Semi-analytical recursive algorithms for convolution calculations **CDS** p125
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
Signal processing of the contingent negative variation in schizophrenia using multilayer perceptrons and predictive statistical diagnosis **SMT** p269
Simultaneous frequency and direction estimation from parallel-array data **RSN** p6
Skew-circular/circular correlation decomposition of prime-factor DCT **VIS** p241
Small-sample properties of some parametric and nonparametric methods for detection of signals by Monte Carlo simulation **VIS** p181
Spectrum shaping in N-channel QPSK-OFDM systems **VIS** p333
Stochastic simulation Bayesian approach to multitarget tracking **RSN** p41
Techniques for optimal enhancement and feature extraction of fetal electrocardiogram **SMT** p482
Theoretical performance of a multisensor track-to-track correlation technique **RSN** p281
Two-dimensional minimum free energy spectral estimation **VIS** p169
Unusual-length number-theoretic transforms using recursive extensions of Rader's algorithm **VIS** p31
Use of perturbation methods in the problem of radar detection against a K-clutter background **RSN** p243
VLSI design of clustering analyser using systolic arrays **CDT** p185

SIMULATION, MODELLING AND IDENTIFICATION

Adaptive control of dominant time delay systems via polynomial identification **CTA** p433
Approximating multirate estimation **VIS** p232
AR modelling of skewed signals using third-order cumulants **VIS** p78
Bearings-only tracking using a set of range-parameterised extended Kalman filters **CTA** p73
Design of multilevel multiharmonic signals for system identification **CTA** p247
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Digital modelling and digital redesign of sampled-data uncertain systems **CTA** p585
DOA estimation by ARMA modelling and pole decomposition **RSN** p115
Dynamic recurrent neural network for system identification and control **CTA** p307
Effect of noise on order parameter estimation for K-distributed clutter **RSN** p33
Estimation of complex Fourier coefficients **CTA** p253
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Fuzzy model based fault diagnosis **CTA** p545
Fuzzy neural networks for nonlinear systems modelling **CTA** p551
Generating piecewise-constant excitations with an arbitrary power spectrum **CTA** p241
Guaranteed cost LQG control of uncertain linear systems **CTA** p95
Heterogeneous and homogeneous parallel architectures for real-time active vibration control **CTA** p625

Identification and dynamic weights for LQG control with integral action **CTA** p647
Identifying linear models of systems suffering nonlinear distortions, with a gas turbine application **CTA** p229
Linguistic fuzzy model identification **CTA** p537
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
MUSIC and maximum likelihood techniques on two-dimensional DOA estimation with uniform circular array **RSN** p105
Neural network approach to signal modelling in power systems **CTA** p257
Neural network modelling of a 200 MW boiler system **CTA** p529
Nonlinear control design for a Hammerstein model system **CTA** p277
Online estimation of stator resistance of an induction motor for speed control applications **EPA** p97
Optimal sampling interval for system identification based on decimation and interpolation **CTA** p15
Parameter estimation of state space models by recurrent neural networks **CTA** p114
Position control of a brushless DC motor without velocity measurements **EPA** p113
Pulse arrival time estimation based on pulse sample ratios **RSN** p153
Real time identification of robot dynamic parameters using parallel processing. 1. Theory **CTA** p359
Robust control of series parallel resonant converters **CTA** p401
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Study of a bias-free least squares parameter estimator **CTA** p1
System identification using partitioned least squares **CTA** p223
Theoretical performance of a multisensor track-to-track correlation technique **RSN** p281
Tracking constrained adaptive power system stabiliser **GTD** p149
Variable-speed drives incorporating interacting multiloop adaptive controllers **CTA** p411

SINGLE ANTENNAS

Adaptive null formation with a reconfigurable reflector antenna **MAP** p220
Analysis of a coupled patch antenna with application in personal communications **MAP** p495
Analysis of aperture-coupled microstrip antenna and array with an airgap **MAP** p485
Boundary-element approach to calculation of wire antenna parameters in the presence of dissipative halfspace **MAP** p435
Broadband couplers for UHF detection of partial discharge in gas-insulated substations **SMT** p237
Discrete complex image MPIE analysis of coax-fed coupled vertical monopoles in grounded dielectric substrate: two formulations **MAP** p269
Dual-band slot-loaded patch antenna **MAP** p225
Dual-reflector synthesis based on analytical gradient-iteration procedures **MAP** p129
Entire-domain analysis of thin-wire antennas near or in lossy ground **MAP** p213
Input impedance of spherical microstrip antenna **MAP** p285
Numerical study of a cylindrical dielectric-resonator antenna coated with a dielectric layer **MAP** p189
Radiation characteristic of slots on conducting circular cylinder covered by eccentric dielectric cylinder **MAP** p168
Reconfigurable reflector antenna producing pattern nulls **MAP** p121
Simplified analysis of coated wire antennas and scatterers **MAP** p14
Variable beamwidth reflector antenna by feed defocusing **MAP** p394

SONAR

Adaptive target tracking algorithms for airborne ultrasonic rangefinders **RSN** p81
Calculating the K-distribution by saddlepoint integration **RSN** p162
Texture classification using a spatial-point process model **VIS** p1

SONICS AND ULTRASONICS

Digital optical microphone and digital transducer **CDS** p135
Directivity of acoustic signals from partial discharges in oil **SMT** p85
Fabrication of a thick film sensor employing an ultrasonic oscillator **SMT** p249
Modified forward-backward overdetermined Prony method and its application in modelling heart sounds **VIS** p375
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Online PCBN tool failure monitoring system based on acoustic emission signatures **SMT** p404
Partial discharge plant-monitoring technology: present and future developments **SMT** p4
Shape classification of flaw indications in three-dimensional ultrasonic images **SMT** p307

SPEECH COMMUNICATION AND PROCESSING

Channel-effect-cancellation method for speech recognition over telephone systems **VIS** p395
Design and simulation of an efficient adaptive delta modulation embedded coder **VIS** p155
Dynamic partial search scheme for stochastic codebook of FS1016 CELP coder **VIS** p52
Isolated Mandarin syllable recognition using segmental features **VIS** p59
Low-frequency suppression of baseband coded sequences **COM** p49
Pulsed residual excited linear prediction **VIS** p105
Speaker recognition using hidden Markov models, dynamic time warping and vector quantisation **VIS** p313

STABILITY

Anticipatory fuzzy control of power systems **GTD** p211
Application of decoupling method to Hamiltonian systems **CTA** p595
Artificial neural network-based method for transient response prediction **GTD** p323
BPD computation and model reference adaptive control (MRAC) of Hammerstein plants **CTA** p475
Co-ordinated multimachine PSS design using both speed and electric power **GTD** p503
Combined active reactive despatch. Part 2: test results **GTD** p401
Computer analysis of small-signal stability of power systems including network dynamics **GTD** p613
Control system design issues for unstable linear systems with saturated inputs **CTA** p335
Controlled series compensation for improving the stability of multi-machine power systems **GTD** p361
Damping of subsynchronous oscillations using adaptive controllers tuned by artificial neural networks **GTD** p415
Developing a neurocompensator for the adaptive control of robots **CTA** p562
Digital control system design for a unique nonlinear MIMO process using QFT technique **CTA** p466
Digital modelling and digital redesign of sampled-data uncertain systems **CTA** p585
Direct neural control system: nonlinear extension of adaptive control **CTA** p661
Discretisation of continuous-time control systems with guaranteed stability **CTA** p323
Dynamic modelling of battery energy storage system and application to power system stability **GTD** p429
Efficient pole placement technique for linear time-variant SISO systems **CTA** p451
Frequency domain technique for designing stabilisers for a power plant with identical generators **GTD** p330
Friction compensation and robustness issues in force/position controlled manipulators **CTA** p569
Fuzzy-logic-based VAr stabiliser for power system control **GTD** p618
Fuzzy logic power system stabiliser **GTD** p277
Fuzzy-set approach to dynamic voltage security assessment **GTD** p190
Guaranteed cost LQG control of uncertain linear systems **CTA** p95
H_∞ optimisation-based power system stabiliser design **GTD** p179
Helicopter flight control using individual channel design **CTA** p58
Identification of synchronous generator saturation models based on on-line digital measurements **GTD** p225
Inverse Nyquist array: a quantitative theory **CTA** p23
Inversion of RBF networks and applications to adaptive control of nonlinear systems **CTA** p617
Linear switching controller convergence **CTA** p329
LKF based robust control of electrical servodrives **EPA** p161
Mixed objective constrained stable generalised predictive control **CTA** p286
Modelling and control of thyristor-controlled series compensators **GTD** p297
Modelling and stability analysis of a permanent-magnet synchronous machine taking into account the effect of cage bars **EPA** p137
Multifrequency Routh approximants for linear systems **CTA** p351
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Multivariable adaptive control for a space station using genetic algorithms **CTA** p81
Multivariable system simplification using moment matching and optimisation **CTA** p103
Nonlinear control design for a Hammerstein model system **CTA** p277
Optimal control with regional pole constraints via the mapping theory **CTA** p638
Oscillatory interaction between synchronous generator and local voltage-dependent load **GTD** p473
Position control of a brushless DC motor without velocity measurements **EPA** p113
Redesign of robust controllers for rigid-link flexible-joint robotic manipulators actuated with harmonic drive gearing **CTA** p508
Robust control of series parallel resonant converters **CTA** p401
Robust performance design of multivariable control systems **CTA** p7
Robust speed control of brushless direct-drive motor using integral variable structure control **EPA** p361
Robust two-degrees-of-freedom control for induction motor servodrive **EPA** p79
Robustness bounds for continuous systems with LQ regulators **CTA** p272
Rule-based variable-gain power system stabiliser **GTD** p29
Solution of the bilinear matrix equation using Astrom-Jury-Agniel algorithm **CTA** p603
Stability of time-delay singularly perturbed systems **CTA** p111
Stability robustness bounds for linear systems with delayed perturbations **CTA** p345
Two-degree-of-freedom linear quadratic Gaussian predictive control **CTA** p295
Variable structure based decentralised adaptive control **CTA** p439

SUPERCONDUCTING MATERIALS AND DEVICES

Comparative study on electrical performance of normal and superconducting multiconductor lines for high-speed interconnects and uniplanar MICs **MAP** p71
Conceptual design of air-core superconducting transformer for 500 kV cable transmission system **GTD** p487
Experimental investigation of the 'post mount' structure in waveguide-type SIS mixers **MAP** p339
Improving efficiencies of superdirective arrays of monopoles over lossy groundplanes by using superconducting disc overlays **MAP** p462
Power handling capability of a HTS stripline structure using an efficient interior-exterior Green's function method **MAP** p472
Supergain printed arrays of closely spaced dipoles made of thick film high-T_c superconductors **MAP** p26

SWITCHGEAR

An investigation into breaker reclosure strategy for adaptive single pole autoreclosing **GTD** p601
Arc modelling in SF_6 circuit breakers **SMT** p189
Current limiting properties of an expanding helical arc **SMT** p201
Determination of M-effect diffusion parameters in high breaking capacity fuses **SMT** p162
Development and application of a 10 MHz digital system for current-zero measurements **SMT** p125
New approach in partial discharge diagnosis and pattern recognition **SMT** p89
Optical fibre investigation of the arc dynamics of a spiral arc current limiting interrupter **GTD** p608
Optical-fibre monitoring of high frequency parasitic arcs in a puffer circuit breaker **SMT** p469

SWITCHING SYSTEMS

Analytical theory of coupled-waveguide Bragg reflectors and resonant transmission filters **OPT** p209
Architectures for synchronous optical TDM switching employing semiconductor laser amplifiers **OPT** p132
Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
New functional multiaddress channel selective terminal using an arrayed waveguide grating multiplexer with cross-connect loopback paths **OPT** p219
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimisation of wavelength spacing in a WDM transmission system in the presence of fibre nonlinearities **OPT** p190

SWITCHING THEORY

A star-based I/O-bounded network for massively parallel systems **CDT** p5
Adaptive wormhole routing in tori with faults **CDT** p386
Analysis of an output-buffered ATM switch with speed-up constraints under correlated and imbalanced bursty traffic **COM** p61
Analysis of banyan networks offered traffic with geometrically distributed message lengths **COM** p285
Analytical theory of coupled-waveguide Bragg reflectors and resonant transmission filters **OPT** p209
Architectures for synchronous optical TDM switching employing semiconductor laser amplifiers **OPT** p132
Backscatter-induced noise and crosstalk in a FDM multidimensional gyro system using two bias modulators in each gyro loop **OPT** p253
Block multiplexing codes for incoherent asynchronous all-optical CDMA using ladder network correlators **OPT** p125
Cell-rate modelling for accelerated simulation of ATM at the burst level **COM** p379
Cost-performance analysis of cascaded crossbar interconnected multiprocessors **CDT** p117
Deadlock-free wormhole routing algorithms for star graph topology **CDT** p395
Design and performance analysis of an asynchronous banyan network switch with window policy **COM** p54
Designing asynchronous sequential circuits for random pattern testability **CDT** p299
Efficient parallel algorithms on optically interconnected arrays of processors **CDT** p87
Efficient state encoding algorithm based on hypercube construction **CDT** p225
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor **CDT** p81
Lower bound study on interconnect complexity of the decomposed finite state machines **CDT** p332
Methodology for derivation of network resources to support video-related services in ATM-based private wide-area networks **COM** p233
Multiple-valued logic network using quantum-device-oriented superpass gates and its minimisation **CDS** p299
Network flow algorithms for routing in networks with wavelength division multiplexing **COM** p238
New approach for traffic characterisation in ATM networks **COM** p87
New functional multiaddress channel selective terminal using an arrayed waveguide grating multiplexer with cross-connect loopback paths **OPT** p219
Non-exhaustive method for identification of optimal variable orderings in the decomposition of complex logic functions **CDT** p373
Optical crosstalk predictions for LED based analogue WDM systems **OPT** p225
Optimisation of wavelength spacing in a WDM transmission system in the presence of fibre nonlinearities **OPT** p190
Performance analysis of an input and output queueing packet switch with a priority packet discarding scheme **COM** p67
Performance analysis of burst admission-control protocols **COM** p7
Proposed UPC meeting both packet video and network goals **COM** p227
Routing and performance of the double tree (DOT) network **CDT** p93
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation **CDT** p49
Technique to minimise area overhead for delay-driven clustering **CDT** p401
Two-level dynamic step sizes of virtual paths on bandwidth allocation in ATM networks **COM** p158
Two parallel paths in incomplete hypercubes **CDT** p353

SYNCHRONOUS MACHINES

Analytical modelling of variable-reluctance machine magnetisation characteristics **EPA** p14
Artificial neural network-based method for transient response prediction **GTD** p323
Contactless measurement of the secondary position in linear reluctance motors **EPA** p355
Development of a model for representing dynamic behaviour of synchronous motor variable speed drives **EPA** p269
Direct-phase modelling of isolated brushless exciter-alternator unit including the magnetic nonlinearities **EPA** p206
Estimation of rotor position and speed of a synchronous reluctance motor for servodrives **EPA** p201
Fuzzy logic power system stabiliser **GTD** p277
H_∞ optimisation-based power system stabiliser design **GTD** p179
Identification of synchronous generator saturation models based on on-line digital measurements **GTD** p225
Modelling and stability analysis of a permanent-magnet synchronous machine taking into account the effect of cage bars **EPA** p137
Multidimensional Laplace transforms for solution of nonlinear equations **SMT** p267
Multimachine power system stabiliser design based on new LQR approach **GTD** p494
Novel approach to alternator field winding interturn fault detection **GTD** p97
Oscillatory interaction between synchronous generator and local voltage-dependent load **GTD** p473
Scaling of switched reluctance motors **EPA** p1
Time-stepping finite element analysis for a synchronous generator feeding a rectifier load **EPA** p50
Transient analysis of three phase reluctance motors fed from a single phase supply **EPA** p104
Use of a novel magnetoresistive angle sensor for controlling switched-reluctance motor speed **SMT** p449

SYSTEMS THEORY

Application of decoupling method to Hamiltonian systems **CTA** p595
Direct neural model reference adaptive control **CTA** p31
Genetic algorithms for fuzzy control.1. Offline system development and application **CTA** p161
Genetic algorithms for fuzzy control.2. Online system development and application **CTA** p177
Multivariable cluster analysis for high-speed industrial machinery **SMT** p417
Partial discharge pattern recognition for three kinds of model electrodes with a neural network **SMT** p75
Scheduling and optimisation for heating of steel soaking pits: case study for hybrid systems **SMT** p362

TELECOMMUNICATION

Channel-effect-cancellation method for speech recognition over telephone systems **VIS** p395
Dynamic partial search scheme for stochastic codebook of FS1016 CELP coder **VIS** p52
Low bit-rate video coding using wavelet vector quantisation **VIS** p141
Low-frequency suppression of baseband coded sequences **COM** p49
Methodology for derivation of network resources to support video-related services in ATM-based private wide-area networks **COM** p233
Modified stochastic gradient algorithm using nonquadratic cost functions for data echo cancellation **VIS** p187
New functional multiaddress channel selective terminal using an arrayed waveguide grating multiplexer with cross-connect loopback paths **OPT** p219
Proposed UPC meeting both packet video and network goals **COM** p227
System performance implications of homodyne beat noise effects in optical fibre networks **OPT** p143
Two-level dynamic step sizes of virtual paths on bandwidth allocation in ATM networks **COM** p158
Window-based surveillance strategies **CDT** p233

TELEVISION

Measurement of scene-dependent quality variations in digitally coded television pictures **VIS** p149

TIME-VARYING SYSTEMS

Efficient pole placement technique for linear time-variant SISO systems **CTA** p451
Linearly pulse-width modulated block pulse functions and their application to linear SISO feedback control system identification **CTA** p44
Stability robustness bounds for linear systems with delayed perturbations **CTA** p345

TRANSFORMERS

Calculating the current distribution in power transformer windings using finite element analysis with circuit constraints **SMT** p231
Calculation of winding losses in high frequency toroidal inductors using multistrand conductors **EPA** p313
Chaotic ferroresonance in power transformers **GTD** p247
Conceptual design of air-core superconducting transformer for 500 kV cable transmission system **GTD** p487
Constrained optimisation procedure for evaluating cyclic loading of power transformers **GTD** p240
Design of a virtual LCR component meter **SMT** p114
Ferroresonant oscillations in capacitor voltage transformers **CDS** p30
Minimisation of circuit complexity of step-up/down three-phase AC to DC converter with sinusoidal input current and unity power factor **EPA** p63
Network modelling of traction substation transformers for studying unbalance effects **GTD** p103
Neural network-based algorithm for power transformer differential relays **GTD** p386
Optimal phase angles of booster transformers in HV and EHV in power systems **GTD** p185
Performance prediction of third-order series resonant convertor **EPA** p29
Phase-shifting transformer with fixed phase between terminal voltage and voltage boost: tool for transient stability margin enhancement **GTD** p257
Phenomenon of sympathetic interaction between transformers caused by inrush transients **SMT** p323
Reactive power/voltage control in a distribution substation using dynamic programming **GTD** p639
Relevance of step-lap joints for magnetic characteristics of transformer cores **EPA** p371
Separation of partial discharges from pulse-shaped noise signals with the help of neural networks **SMT** p69
SEPIC-derived three-phase sinusoidal rectifier operating in discontinuous current conduction mode **EPA** p239
Transformer for multimegahertz power applications **EPA** p379
Transformer matrix of some transmission lines topologies **CDS** p21

TRANSMISSION LINE THEORY

Analysis of 3D microwave cavities using hierarchal vector finite elements **MAP** p373
Analysis of couplers composed of a fibre half-block with a slab overlay: effects of curvature of the fibre and asymmetry of the slab waveguide **OPT** p176
Analysis of optical directional couplers composed of asymmetrically curved waveguides **OPT** p305
Analysis of periodic fin line resonators **MAP** p411
Analytical theory of coupled-waveguide Bragg reflectors and resonant transmission filters **OPT** p209
Application of the transmission line matrix method to the analysis of scattering by three-dimensional objects **MAP** p319
Calculation of dielectric resonators with complicated constitutive parameters **MAP** p477
Cavity feed technique for slot-coupled microstrip patch array antenna **MAP** p452
Comparative study on electrical performance of normal and superconducting multiconductor lines for high-speed interconnects and uniplanar MICs **MAP** p71
Comparison between a quasistatic space-domain analysis and a full-wave spectral-domain analysis for high-frequency interconnecting crossover in multilayered dielectric media **MAP** p275
Complete scattering parameter characterisation by FDTD method of Y-junction power dividers with small output angles **MAP** p379
Computation of coupling between whispering gallery mode dielectric resonators and a microstrip transmission line **MAP** p265
Coplanar coupled lines: the effects of the presence of the lateral ground planes, upper and lower ground planes, and the V-shaped microshield ground walls **MAP** p63
Design of integrated waveguide twist components **MAP** p345
Discussion of the relaxation oscillation frequency in Ga(Al)As quantum well laser structures **OPT** p232
Effect of roughness and inhomogeneity on evanescent single-mode optical couplers **OPT** p288
Eigensusceptances and eigenreactances of symmetrical waveguide inductive obstacles using the finite element method **MAP** p384
Electromagnetic analysis of a two-wire transmission line of parallel cylinders of unequal radii with dielectric coating **SMT** p288
Evaluation of cut-off frequencies of higher order modes in eccentric coaxial line **MAP** p350
Exact and variational Fourier transform methods for analysis of multilayered planar waveguides **OPT** p66
Generalised analysis of double-coupler doubly-resonant optical circuit **OPT** p296

Hybrid mode analysis of parallel coupled inset dielectric guides **MAP** p57
Modal analysis of PbSe-clad optical waveguides **OPT** p183
Modified spectral-domain approach for microstrip lines with finite metallisation thickness and conductivity **MAP** p357
Multimode equivalent network representation of inductive and capacitive multiple posts **MAP** p41
Multiple aperture higher order mode couplers: analysis and design **MAP** p93
Numerical modelling and simulation of hysteresis effects in magnetic cores using transmission-line modelling and the Preisach theory **EPA** p57
Performance of the LSBRM using efficient weighting functions for planar structures **MAP** p364
Power handling capability of a HTS stripline structure using an efficient interior-exterior Green's function method **MAP** p472
Proposal for high extinction ratio $LiNbO_3$ optical waveguide cutoff modulator **OPT** p248
Q-factor measurement with a scalar network analyser **MAP** p369
Scattering characteristics of rectangular coaxial line discontinuities **MAP** p257
Single-cavity abreast two-device power combiner **MAP** p333
TE waves in circular nonlinear optical antiwaveguide **OPT** p293
Theory of excitation of chirowaveguides **MAP** p240
Transformer matrix of some transmission lines topologies **CDS** p21
Vector complex eigenmode analysis of microwave cavities **MAP** p457
Waveform relaxation analysis of lossy coupled transmission line sets in cascade **CDS** p373.

USER INTERFACES

Isolated Mandarin syllable recognition using segmental features **VIS** p59

WAVEGUIDE COMPONENTS

Analysis of 3D microwave cavities using hierarchal vector finite elements **MAP** p373
Analysis of periodic fin line resonators **MAP** p411
Calculation of dielectric resonators with complicated constitutive parameters **MAP** p477
Complete scattering parameter characterisation by FDTD method of Y-junction power dividers with small output angles **MAP** p379
Design of integrated waveguide twist components **MAP** p345
Eigensusceptances and eigenreactances of symmetrical waveguide inductive obstacles using the finite element method **MAP** p384
Experimental investigation of the 'post mount' structure in waveguide-type SIS mixers **MAP** p339
High Q-factor open resonator measurement system for 94 GHz waveband applications **MAP** p414
Hybrid mode analysis of parallel coupled inset dielectric guides **MAP** p57
Improved frequency domain analysis of microstrip circuits by the method of moments **MAP** p421
Innovative power distributed amplifier using the Wilkinson combiner **MAP** p97
Multiple aperture higher order mode couplers: analysis and design **MAP** p93
Novel slow-wave structure for narrow-band quasi-transversal filters **MAP** p389
Performance and analysis of an aluminium nitride isolation resistor **MAP** p282
Q-factor measurement with a scalar network analyser **MAP** p369
Scattering characteristics of rectangular coaxial line discontinuities **MAP** p257
Single-cavity abreast two-device power combiner **MAP** p333
Temperature stability of quality factor of junction circulators **MAP** p67
Waveguide bandpass filter of millimetre waves using polycrystalline yttrium iron garnet **MAP** p251

WAVEGUIDES

Comparison between a quasistatic space-domain analysis and a full-wave spectral-domain analysis for high-frequency interconnecting crossover in multilayered dielectric media **MAP** p275
Computation of coupling between whispering gallery mode dielectric resonators and a microstrip transmission line **MAP** p265
Coplanar coupled lines: the effects of the presence of the lateral ground planes, upper and lower ground planes, and the V-shaped microshield ground walls **MAP** p63
Hybrid mode analysis of parallel coupled inset dielectric guides **MAP** p57
Linear phase arrays based on slitted asymmetric ridge waveguides **MAP** p47
Modified spectral-domain approach for microstrip lines with finite metallisation thickness and conductivity **MAP** p357
Moment method analysis of a horizontally polarised omnidirectional slot array antenna **MAP** p1
Multimode equivalent network representation of inductive and capacitive multiple posts **MAP** p41
On the surface impedance used to model the conductor losses of microstrip structures **MAP** p35
Power handling capability of a HTS stripline structure using an efficient interior-exterior Green's function method **MAP** p472
Scattering characteristics of rectangular coaxial line discontinuities **MAP** p257
Theory of excitation of chirowaveguides **MAP** p240

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of individual contributions on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA (1350–2387/95 $10.00). This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 0171 240 1871; telex: 261176 IEELDN G; facsimile: 0171 240 7735.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ANALOGUE ELECTRONICS

Concurrent error detection in array multipliers by BIDO p425

AUTOMATA THEORY

Efficient state encoding algorithm based on hypercube construction p225
Lower bound study on interconnect complexity of the decomposed finite state machines p332
Self-adaptive random-access protocols for WDM passive star networks p306
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation p49
State assignment of finite state machines using a genetic algorithm p279

AUTOMATIC TEST SYSTEMS

Efficient global strategy for designing and testing scanned sequential circuits p170
Weighted BIST structures in the arithmetic unit of a communication processor p360

CIRCUIT THEORY AND DESIGN

Anatomy of a simulation backplane p377
CHiRPS: a general-area parallel multilayer routing system p208
CONVERGE: a circular-assignment-based switchbox router with via reduction p72
Design and test generation of C-testable high-speed carry-free dividers p193
Efficient functional verification algorithm for Petri-net-based parallel controller designs p255
Efficient global strategy for designing and testing scanned sequential circuits p170
Efficient height reduction over-the-cell channel router p293
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes p215
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis p65
Lower bound study on interconnect complexity of the decomposed finite state machines p332
Orientation assignment of standard cells using a fuzzy mathematical transformation p157

CODES AND DECODING

Cheating detection and cheater identification in secret sharing schemes p367
Concurrent error detection in array multipliers by BIDO p425
Design and hardware architectures for dynamic Huffman coding p411
Efficient computation of quaternary fixed polarity Reed-Muller expansions p345
Efficient sharing (broadcasting) of multiple secrets p237
Enhancing the security of El Gamal's signature scheme p376
Fast algorithms for LUC digital signature computation p165
New class of t-error correcting and all unidirectional error detecting (t-EC/AUED) codes p32
Novel design of arithmetic coding for data compression p419
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions p325
The security of He and Kiesler's signature schemes p370

COMMUNICATION SYSTEM THEORY

Cost-performance analysis of cascaded crossbar interconnected multiprocessors p117
Window-based surveillance strategies p233

COMPUTATIONAL COMPLEXITY

CHiRPS: a general-area parallel multilayer routing system p208
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions p249
Efficient parallel algorithms on optically interconnected arrays of processors p87
Efficient state encoding algorithm based on hypercube construction p225
Parallel multigrid algorithms on CM-5 p177

COMPUTER APPLICATIONS

Techniques for ASIC implementation of vector control p318

COMPUTER COMMUNICATIONS

Window-based surveillance strategies p233

DATA COMMUNICATION

Efficient parallel algorithms on optically interconnected arrays of processors p87
Methodical use of cryptographic transformations in authentication protocols p272
Self-adaptive random-access protocols for WDM passive star networks p306
Two parallel paths in incomplete hypercubes p353
Window-based surveillance strategies p233

DATA HANDLING

Design and hardware architectures for dynamic Huffman coding p411
Novel design of arithmetic coding for data compression p419
Spatial bounding of complex CSG objects p431

DATA SECURITY

Cheating detection and cheater identification in secret sharing schemes p367
Efficient sharing (broadcasting) of multiple secrets p237
Enhancing the security of El Gamal's signature scheme p376
Fast algorithms for LUC digital signature computation p165
Methodical use of cryptographic transformations in authentication protocols p272
On the Matsumoto and Imai human identification scheme p313
The security of He and Kiesler's signature schemes p370

DIGITAL ARITHMETIC

Design and test generation of C-testable high-speed carry-free dividers p193
Efficient CORDIC-based systolic architectures for the discrete Hartley transform p201
Fast algorithms for LUC digital signature computation p165
Optimising a high-speed serial/parallel sum-of-products hardware structure with respect to bus utilisation p77
Quotient prediction without prescaling p15

DIGITAL ELECTRONICS

Design and VLSI implementation of an address generation coprocessor p145
Efficient CORDIC-based systolic architectures for the discrete Hartley transform p201
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes p215
Lower bound study on interconnect complexity of the decomposed finite state machines p332
Manifestations of faults in single- and double-BJT BiCMOS logic gates p135
Reliability of semiconductor RAMs with soft-error scrubbing techniques p337
Techniques for ASIC implementation of vector control p318
VLSI design of clustering analyser using systolic arrays p185
Weighted BIST structures in the arithmetic unit of a communication processor p360

DIGITAL TECHNIQUES

Design and VLSI implementation of an address generation coprocessor p145
Efficient parallel algorithms on optically interconnected arrays of processors p87

ELECTRONIC CIRCUITS

Efficient height reduction over-the-cell channel router p293

INFORMATION THEORY

New class of t-error correcting and all unidirectional error detecting (t-EC/AUED) codes p32
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions p325

INTEGRATED CIRCUITS

Design and VLSI implementation of an address generation coprocessor p145
Manifestations of faults in single- and double-BJT BiCMOS logic gates p135
Orientation assignment of standard cells using a fuzzy mathematical transformation p157

LOGIC AND SWITCHING CIRCUITS

Anatomy of a simulation backplane p377
Concurrent error detection in array multipliers by BIDO p425
Design and test generation of C-testable high-speed carry-free dividers p193
Designing asynchronous sequential circuits for random pattern testability p299
Distributed fault simulation for sequential circuits by pattern partitioning p287
Effects of technology mapping on fault-detection coverage in reprogrammable FPGAs p407
Efficient computation of quaternary fixed polarity Reed-Muller expansions p345
Efficient global strategy for designing and testing scanned sequential circuits p170
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions p249
Manifestations of faults in single- and double-BJT BiCMOS logic gates p135
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation p49
Synthesis of multioutput logic networks using spectral techniques p241
Technique to minimise area overhead for delay-driven clustering p401
Test time reduction for scan-designed circuits by sliding compatibility p41

LOGIC DESIGN

Anatomy of a simulation backplane p377
Design and test generation of C-testable high-speed carry-free dividers p193
Designing asynchronous sequential circuits for random pattern testability p299
Distributed fault simulation for sequential circuits by pattern partitioning p287
Efficient functional verification algorithm for Petri-net-based parallel controller designs p255
Efficient global strategy for designing and testing scanned sequential circuits p170
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions p249
Efficient state encoding algorithm based on hypercube construction p225
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes p215
Lower bound study on interconnect complexity of the decomposed finite state machines p332
Manifestations of faults in single- and double-BJT BiCMOS logic gates p135
Non-exhaustive method for identification of optimal variable orderings in the decomposition of complex logic functions p373
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation p49
Synthesis of multioutput logic networks using spectral techniques p241
Technique to minimise area overhead for delay-driven clustering p401
Test time reduction for scan-designed circuits by sliding compatibility p41
Weighted BIST structures in the arithmetic unit of a communication processor p360

MATHEMATICAL TECHNIQUES

Cost-performance analysis of cascaded crossbar interconnected multiprocessors p117
Efficient computation of quaternary fixed polarity Reed-Muller expansions p345
Efficient CORDIC-based systolic architectures for the discrete Hartley transform p201
Efficient functional verification algorithm for Petri-net-based parallel controller designs p255
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor p81
High-level synthesis of DSP datapaths by global optimisation of variable lifetimes p215
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis p65
Optimising a high-speed serial/parallel sum-of-products hardware structure with respect to bus utilisation p77
Orientation assignment of standard cells using a fuzzy mathematical transformation p157
Parallel controller synthesis using Petri nets p263
Routing and performance of the double tree (DOT) network p93
Spatial bounding of complex CSG objects p431
State assignment of finite state machines using a genetic algorithm p279

MULTIPROCESSOR SYSTEMS

A star-based I/O-bounded network for massively parallel systems p5
Fine grain scheduler for shared-memory multiprocessor systems p98
Parallel controller synthesis using Petri nets p263

NEURAL NETS

Associative memory architecture for video compression p55
Performance of a neural binary pattern classifier p152

OPTIMISATION

High-level synthesis of DSP datapaths by global optimisation of variable lifetimes p215

PARALLEL PROCESSING

A star-based I/O-bounded network for massively parallel systems p5
Adaptive wormhole routing in tori with faults p386
CHiRPS: a general-area parallel multilayer routing system p208
Cost-performance analysis of cascaded crossbar interconnected multiprocessors p117
Deadlock-free wormhole routing algorithms for star graph topology p395
Efficient CORDIC-based systolic architectures for the discrete Hartley transform p201
Efficient parallel algorithms on optically interconnected arrays of processors p87
Fast algorithms for LUC digital signature computation p165
Fine grain scheduler for shared-memory multiprocessor systems p98
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor p81
Intelligent code migration technique for synchronisation operations on a multiprocessor p107
Methodical use of cryptographic transformations in authentication protocols p272
One-dimensional processor arrays for linear algebraic problems p1
Parallel multigrid algorithms on CM-5 p177
Performance of a neural binary pattern classifier p152
Routing and performance of the double tree (DOT) network p93
Two parallel paths in incomplete hypercubes p353
Using a resource-limited instruction scheduler to evaluate the iHARP processor p23
VLSI design of clustering analyser using systolic arrays p185

PATTERN RECOGNITION

Orientation assignment of standard cells using a fuzzy mathematical transformation p157
Performance of a neural binary pattern classifier p152

PERFORMANCE EVALUATION

Adaptive wormhole routing in tori with faults p386
Concurrent error detection in array multipliers by BIDO p425
Cost-performance analysis of cascaded crossbar interconnected multiprocessors p117
Reliability of semiconductor RAMs with soft-error scrubbing techniques p337
Two parallel paths in incomplete hypercubes p353
Using a resource-limited instruction scheduler to evaluate the iHARP processor p23

PRODUCTION ENGINEERING

Reliability of semiconductor RAMs with soft-error scrubbing techniques p337

PROGRAMMING THEORY

Associative memory architecture for video compression p55
CHiRPS: a general-area parallel multilayer routing system p208
Efficient method for the identification of optimum disjunctive decompositions of complex logic functions p249
Efficient parallel algorithms on optically interconnected arrays of processors p87
Efficient state encoding algorithm based on hypercube construction p225
Integrated scheduling, allocation and module selection for design-space exploration in high-level synthesis p65
Parallel multigrid algorithms on CM-5 p177
Quotient prediction without prescaling p15

SIGNAL PROCESSING

Design and VLSI implementation of an address generation coprocessor p145
Recursive relationships, fast transforms, generalisations and VLSI iterative architecture for Gray code ordered Walsh functions p325
VLSI design of clustering analyser using systolic arrays p185

SWITCHING THEORY

A star-based I/O-bounded network for massively parallel systems p5
Adaptive wormhole routing in tori with faults p386
Cost-performance analysis of cascaded crossbar interconnected multiprocessors p117
Deadlock-free wormhole routing algorithms for star graph topology p395
Designing asynchronous sequential circuits for random pattern testability p299
Efficient parallel algorithms on optically interconnected arrays of processors p87
Efficient state encoding algorithm based on hypercube construction p225
Genetic algorithm for mapping tasks onto a reconfigurable parallel processor p81
Lower bound study on interconnect complexity of the decomposed finite state machines p332
Non-exhaustive method for identification of optimal variable orderings in the decomposition of complex logic functions p373
Routing and performance of the double tree (DOT) network p93
SOLiT: An automated system for synthesising reliable sequential circuits with multilevel logic implementation p49
Technique to minimise area overhead for delay-driven clustering p401
Two parallel paths in incomplete hypercubes p353

TELECOMMUNICATION

Window-based surveillance strategies p233
